

General Knowledge Club of Mahinda Rajapaksha College - Homagama

Practice papers, Quiz papers, Selection Tests & Workshop Materials conducted from March 2025 to July 2026

Word from the Compilers...

Founded on **20 October 2022**, the **General Knowledge Club of Mahinda Rajapaksha College, Homagama** has had a remarkable journey in the Sri Lankan school quizzing arena. Our journey began with our participation in the **32nd Blue & Gold Quiz**, organized by the General Knowledge Club of Royal College, Colombo 07. Since then, our quizzers have taken part in numerous quiz competitions, bringing many achievements and honours to our alma mater.

To streamline our quizzing activities, two key positions, **Main Quiz Team Captain** and **Main Quiz Team Coordinator**, were introduced in 2022. In January 2023, the then Executive Committee decided to standardize the quizzing structure by officially establishing the **Main Quiz Team**. With this restructuring, the Main Quiz Team Captain was redesignated as the **Main Quiz Team Coordinator**, while the original Main Quiz Team Coordinator became the **Assistant Main Quiz Team Coordinator**. A dedicated team of sixteen talented students was then formed to represent the school in quiz competitions.

Following the establishment of the Main Quiz Team, we successfully undertook numerous quizzing missions. To further strengthen the team's development, we, as former members of the Main Quiz Team, volunteered to mentor and train our junior quizzers beginning in **March 2025**. Prior to this, the senior members of the club had taken the initiative to train their juniors. However, in response to their request and the evolving needs of the team, we decided to share our experience and knowledge as past quizzers. Although coaching had already begun in March 2025, the title "**Main Quiz Team Coach**" was officially adopted in **August 2025**, marking the beginning of a new chapter in our journey.

This booklet is a collection of the practice papers, assessments, selection tests, workshop materials, and quiz papers prepared and conducted between **March 2025 and July 2026**. We hope it will serve as a valuable resource for future generations of quizzers and for all enthusiasts of general knowledge. May this booklet remain a treasure from our past, inspiring and guiding those who aspire to learn, compete, and excel.

Quizzing is a hobby, and at times, a competition. Yet it is far more than the pursuit of trophies. In quizzing, we never truly lose. We either win or gain knowledge, experience, and wisdom that remain with us forever.

We wish you every success in your quizzing journey.

Happy Quizzing!

R.K.P.S. Aththanayake

Alumnus, G.C.E. A/L Batch of 2023

Founder & President (2022-2023)

General Knowledge Club, Mahinda Rajapaksha College, Homagama

(F) This the country where the 2024 Summer Olympic Games where held on.

- France

(G) This is a Swedish climate and political activist, who was born in 2003, initially known for challenging world leaders to take immediate action to mitigate the effects of climate change.

- Greta Thunberg

(H) This a muscular organ that found in Humans and pumps blood through the blood vessels.

- Heart

(I) Tel-Aviv Yafo is a city of this country.

- Israel

(J) This is a british sports & luxurious car brand introduced in 1935 and related to Land Rovers.

- Jaguar / Jaguar Land Rover

(K) This is the Sri Lankan city where the last major kingdom of Sri Lanka established in.

- Kandy

(L) Juvenile version of Domestic sheep.

- Lamb

(M) This is the Capital city of Russia since 1918.

- Moscow

(N) This is a country in Africa, which has the capital city "Abuja".

- Nigeria

(O) This is the winner of Miss World 2025.

- Opal Suchata

(P) This is the headquarters building of the United States Department of Defense, which is located in Virginia state.

- Pentagon

(Q) This is the country in the Middle East and has the capital city "Doha".

- Quatar

(R) This is a hydrophobic viral disease that causes encephalitis in humans and other mammals.

- Rabies

(S) This is a fictional character in the Disney's "Lion King" franchise. And first appeared as the cub of Mufasa.

- Simba

(T) This is partner and social dance originated in 1880 at Rio de la Pata.

- Tango

(U) This a House of Game of Thrones, held fealty to House Stark of Winterfell and used the resident called "the Last Hearth".

- Umber

(V) This is the name given to the meat of deer.

- Venison

(W) This is the name of the current Prince of Wales.

- William

(X) This is the professional name of an American rapper and a song writer who was murdered in 2018 at the deerfield beach, Florida, USA.

- XXXTentacion

(Y) This is an American web portal that also provides a search engine which was founded in January, 1994.

- Yahoo

(Z) This is the surname of the current Ukrainian President.

- Zelensky

සාමාන්‍ය විද්‍යාව (General Science)

කාලය: මිනිත්තු 10

පාසල:

කණ්ඩායම් නායක අත්සන:

සැලකිය යුතුයි:

- ප්‍රශ්න සියල්ලටම මෙම පත්‍රයේම පිළිතුරු සපයන්න.
- පිළිතුරු සැපයීමේ කාලය අතරතුර මූලාශ්‍ර පරිශීලනය හෝ බාහිර පාර්ශවයන්ගේ උපකාර ලබාගැනීම සම්පූර්ණයෙන්ම තහනම් වේ.
- මිනිත්තු 10 අවසානයේ කණ්ඩායම් නායක අත්සන සමඟින් පිළිතුරු පත්‍රය නිරීක්ෂකවරුන්ට ලබාදිය යුතු වේ.
- Answer all questions in the paper itself.
- Any kind of external support or using resources while answering is strictly prohibited.
- After designated 10 minutes has passed, the team must handover the answer sheets to the invigilators with the signature of the team captain.

01. Oxygen is a chemical element with the symbol "O" and atomic number 8. It was discovered independently by Carl Wilhelm Scheele in 1771 and Joseph Priestley in 1774. Who named this element, "Oxygen" in 1777?

ඔක්සිජන් යනු පරමාණුක ක්‍රමාංකය 8 සහ සංකේතය "O" වන රසායනික මූලද්‍රව්‍යයකි. ඔක්සිජන් මූලද්‍රව්‍ය 1777 වර්ෂයේ දී හඳුනාගෙන නම් කරන ලද විද්‍යාඥයා කවුරුන් ද ?

Answer:

02. Launched in 2006, NVIDIA's GPUs use a proprietary platform and programming model called CUDA to unlock their parallel processing capabilities for AI and scientific computing; what does the acronym CUDA stand for?

2006 වර්ෂයේ දී හඳුන්වා දෙන ලද NVIDIA සමාගමෙහි හි GPU, AI සහ විද්‍යාත්මක පරිගණකකරණය සඳහා ඔවුන්ගේ සමාන්තර සැකසුම් හැකියාවන් භාවිතය සඳහා CUDA නමින් ක්‍රමලේඛන ආකෘතියක් භාවිතා කරයි; CUDA යන කෙටි යෙදුමෙන් අදහස් කරන්නේ කුමක්ද?

Answer:

03. Hallucinogens; are a large and diverse class of psychoactive drugs that can produce altered states of consciousness characterized by major alterations in thought, mood, and

perception as well as other changes. Which of the following is a hallucinogen? Underline the correct answer.

ස්වප්නකාරක සංයෝග යනු මිනිස් සිතිවිලි සහ හැඟීම් සඳහා බලපෑම් එල්ල කරන කෘත්‍රීම වෛතසික නිර්මාණය කළ හැකි ඖෂධ කාණ්ඩයකි. පහත ඒවා අතුරින් ස්වප්නකාරකයක් වන්නේ කුමක්ද?

- (A) Nitrous Oxide
- (B) Mescaline
- (C) Vallium
- (D) Gasoline
- (E) Heroin

04. This image shows a bird endemic to highlands of Sri Lanka. It has olive upper parts and yellowish under parts. The crown of the head is grey. Identify this bird species which can be also seen in the LKR 5000 note in 11th note series issued by the Central Bank of Sri Lanka. Underline the correct answer.

ශ්‍රී ලංකාවේ උස්බිම්වලට ආවේණික කහ මිශ්‍ර වර්ණවලින් යුත් සිරුරකට උරුමකම් කියන ශ්‍රී ලංකා මහ බැංකුව විසින් නිකුත් කරන ලද 11 වන මුදල් නෝට්ටු කාණ්ඩයට අයත් රු.5000 නෝට්ටුවේ ද දැකගත හැකි මෙම පක්ෂි විශේෂය හඳුනාගන්න.

- (A) *Otus thilohoffmanni*
- (B) *Zosterops ceylonensis*
- (C) *Eumyias sordida*
- (D) *Pycnonotus penicillatus*
- (E) *Loriculus beryllinus*

05. This serpent species found from India through Southeast Asian region to Solomon Islands. Which are also adapted to a completely aquatic life. Identify this snake species, the only serpent species belongs to Family Acrochordidae found in Sri Lanka. Underline the correct answer.

ඉන්දියාව සහ අග්නිදිග ආසියාතික කලාපය තුළ ව්‍යාප්තව සිටින සම්පූර්ණ ජලජ ජීවිතයකට අනුවර්තනය වී ඇති ශ්‍රී ලංකාව තුළ හමුවන ඇක්‍රොකොඩ්ටේ කුලයට අයත් එකම සර්ප විශේෂය ද වන මෙම සර්ප විශේෂය හඳුනාගන්න.

- (A) *Eryx conicus*
- (B) *Acrochordus granulatus*
- (C) *Python molurus*
- (D) *Acrochordus arafurae*
- (E) *Amphiesma stolatum*

06. A phobia is an anxiety disorder involving excessive and persistent fear of a situation or object. What is known as the fear of driving or riding in a car? Underline the correct answer.

හීනිකාව යනු යම් යම් විශේෂිත වස්තූන් හෝ තත්ත්වයන් කෙරෙහි දැඩි බියකින් පසුවීමයි. කාර් රථයක් තුළ ගමන් කිරීම හෝ ධාවනය කිරීම පිළිබඳ හීනිකා තත්ත්වය හඳුන්වන්නේ කෙසේද ?

- (A) Gynophobia
- (B) Thalassophobia
- (C) Necrophobia
- (D) Trypophobia
- (E) Amaxophobia

07. What is the forensic medical term used to describe a situation which mostly occurs in people with a large body, where a person's body position prevents them from breathing properly by displacing the diaphragm into the thoracic cavity, potentially leading to suffocation?

බොහෝවිට විශාල ශරීර සහිත පුද්ගලයන්ගේ ශරීර ඉරියව්වේ දෝෂ නිසා (මුනින් අතට සිටීම) මහා ප්‍රාචීරය උරස් කුහරය තුළට විස්ථාපනය වීම හරහා ශ්වසන ක්‍රියාවලිය අඩපණ වීමේ තත්ත්වය විස්තර කිරීමට යොදාගැනෙන අධිකරණ වෛද්‍ය විද්‍යාත්මක යෙදුම කුමක් ද?

Answer:

08. The Nobel Prize in Chemistry is awarded annually by the Royal Swedish Academy of Sciences to scientists in the various fields of chemistry. Who is the British AI researcher and entrepreneur who jointly received the 2024 Nobel Prize in Chemistry for his contributions to protein structure prediction using artificial intelligence?

කෘත්‍රීම බුද්ධිය භාවිතයෙන් ප්‍රෝටීනවල ව්‍යුහය උපකල්පනය කිරීම සඳහා සිදුකරන ලද දායකත්වය වෙනුවෙන් 2024 රසායන විද්‍යාව සඳහා වන නොබෙල් සම්මානයෙන් පිදුම් ලද බ්‍රිතාන්‍ය ජාතික කෘත්‍රීම බුද්ධි පර්යේෂකවරයා කවුරුන් ද?

Answer:

09. The Human Zoo is a book written by a British zoologist and published in 1969. Who is the author of this book?

The Human Zoo (මනුසත් උයන) යනු 1969 වසරේ දී බ්‍රිතාන්‍ය ජාතික සත්ත්ව විද්‍යාඥයෙකු විසින් රචිත අග්‍රගණ්‍ය විද්‍යා ග්‍රන්ථයකි. මෙහි කතුවරයා කවුරුන් ද?

Answer:

10. Inductance is the tendency of an electrical conductor to oppose a change in the electric current flowing through it. What is the SI unit that used to measure Inductance?

ප්‍රේරකතාව යනු විද්‍යුත් සන්නායකයක් හරහා ගලන විද්‍යුත් ධාරාවේ විචලනයට විරුද්ධව ඇතිකරන නැඹුරුතාවයි. ප්‍රේරකතාව මැනීම සඳහා භාවිතා කරන අන්තර්ජාතික සම්මත ඒකකය කුමක් ද?

Answer:

Answer Script

01. Antoine Lavoisier/ඇන්තනී ලැවෝසියර්
02. Compute Unified Device Architecture
03. (B) Mescaline
04. (D) *Pycnonotus penicillatus*
05. (B) *Acrochordus granulatus*
06. (E) Amaxophobia
07. Positional asphyxia/postural asphyxia
08. Sir Demis Hassabis
09. Desmond Morris
10. Henry (Symbol:H)

01. The Meethotamulla garbage dump collapsed, causing nearly 30 deaths and extensive property damage. When did this tragedy occur? Underline the correct answer.

මීතොටමුල්ල කසළ කන්ද නාය යාමෙන් පුද්ගල මරණ 30කට ආසන්න ප්‍රමාණයක් සහ දේපළ හානි රැසක් වාර්තා වීම සිදුවිය. මෙම ව්‍යසනය සිදුවූයේ කවදා ද?

- (A) 17th May 2016
- (B) 14th April 2017
- (C) 21st April 2019
- (D) 18th January 2020
- (E) None of the above

02. The Aitken Spence Power Station, also known as the Meethotamulla Power Station, is a municipal solid waste-fired thermal power station operated by the Western Power Company. What is the exact location of this power plant?

අයිට්කින්ස් ස්පෙන්ස් බලාගාරය හෝ මීතොටමුල්ල බලාගාරය කසළ මඟින් බලශක්තිය උත්පාදනය කරන විදුලි බලාගාරයකි. මෙහි මෙහෙයුම් කටයුතු වෙස්ටර්න් පවර් කම්පනි මඟින් සිදුකරන අතර මෙය පිහිටා ඇති ස්ථානය නිවැරදිව නම් කරන්න.

Answer:

03. Who is the Sri Lankan designer and developer of the "Smart Drain – Urban Inventors" project, which won the prestigious World Intellectual Property Organization's Global Award 2025 in Geneva, Switzerland?

සුහුරු කාණු පද්ධතියක් නිර්මාණය කිරීම මගින් ශ්‍රී ලංකාවට ලෝකය හමු වේ කීර්තියක් අත්කර දුන් ශ්‍රී ලාංකීය නිර්මාපකයා කවුරුන් ද?

Answer:

04. A landfill is a site for the disposal of waste materials and is the oldest and most common form of waste disposal. According to historical records, where was the earliest known landfill located?

භූ පිරවීම් යනු කසල බැහැර කිරීම සඳහා ලෝකයේ යොදාගැනෙන වඩාත් පැරණි ක්‍රමවේදයකි. ඉතිහාස වාර්තා අනුව පැරණිතම භූ පිරවීම වාර්තා වන්නේ කිනම් ප්‍රදේශයේ ද ?

Answer:

05. Which of the following microorganisms is known as the "plastic-eating bacteria," discovered around 2016 and capable of breaking down Polyethylene terephthalate (PET)? Underline the correct answer.

පහත සඳහන් ක්ෂුද්‍ර ජීවීන් අතුරින් ප්ලාස්ටික් පරිභෝජනය කොට විනාශ කළ හැකි ජීවී විශේෂය හඳුනාගන්න.

- (A) *Ideonella sakaiensis*
- (B) *Rhizobium aegyptiacum*
- (C) *Bacillus subtilis*
- (D) *Gardnerella vaginalis*
- (E) *Agrobacterium bohemicum*

06. According to the national colour codes for the segregation of hospital waste, issued in 2006 by the Ministry of Health, Sri Lanka, what colour is used to identify bins and bags for paper waste?

සෞඛ්‍ය අමාත්‍යාංශය මගින් හඳුන්වාදෙන ලද රෝහල් කසල වෙන්කිරීමේ ක්‍රමවේදය යටතේ කඩදාසි අපද්‍රව්‍ය බහාලන මලු සහ බඳුන් සඳහා ලබා දෙන ලද කේත වර්ණය කුමක් ද?

Answer:

07. Which of the following is arranged in the increasing order of Global Warming Potential (GWP)? Underline the correct answer.

හරිතාගාර වායු ප්‍රබලතාව වැඩිවන අනුපිළිවෙලට පෙළගස්වා ඇති පිළිතුර තෝරන්න.

- (A) $\text{CO}_2 < \text{N}_2\text{O} < \text{NO}_2 < \text{CH}_4$
- (B) $\text{HFC 134a} < \text{HCFC 22} < \text{CFC 12} < \text{HFC 23}$
- (C) $\text{N}_2\text{O} < \text{CO}_2 < \text{HFC 23} < \text{CH}_4$
- (D) $\text{CH}_4 < \text{HCFC 22} < \text{CFC 12} < \text{CO}_2$
- (E) $\text{N}_2\text{O} < \text{CH}_4 < \text{CO}_2 < \text{CFC 12}$

08. The "Clean Sri Lanka" project is a nationwide initiative aimed at fostering a better environment and promoting ethical principles across the three pillars of sustainability: Economic, Social, and Environmental. When was this project officially launched?

ක්ලීන් ශ්‍රී ලංකා ව්‍යාපෘතිය නිල වශයෙන් ආරම්භ කරන ලද්දේ කවදාද?

Answer:

09. Biogas is a renewable gaseous energy source produced from raw materials such as agricultural waste, manure, municipal waste, plant material, sewage, green waste, wastewater, and food waste. It is produced by anaerobic digestion with methanogens inside an anaerobic digester, bio digester, or bioreactor. What are the main gases found in biogas? Underline the correct answer.

ජීව වායුවේ ප්‍රධාන වශයෙන් අන්තර්ගතවන වායුන් වර්ග මොනවාද ?

- (A) H_2S , NH_3 , N_2O
- (B) CH_4 , H_2S , NH_3
- (C) CH_4 , CO_2 , H_2S
- (D) N_2O , NO_2 , CO_2
- (E) CH_4 , O_2 , H_2

10. What is known as the largest e-waste dump in the world?

ලොව විශාලතම ඉලෙක්ට්‍රොනික අපද්‍රව්‍ය කසළාංගනය ලෙස හැඳින්වෙන්නේ කොහේද ?

01. Who was the first non-Congress Prime Minister of India to serve a full term in office from 1999 to 2004, and who was also one of the co-founders of the Bharatiya Janata Party (BJP)?

1999 සිට 2004 දක්වා සම්පූර්ණ අග්‍රාමාත්‍ය ධුර කාලයක් දැරූ ඉන්දීය ඉතිහාසයේ ප්‍රථම කොංග්‍රස් පාක්ෂික නොවන අග්‍රාමාත්‍යවරයා කවුරුන්ද?

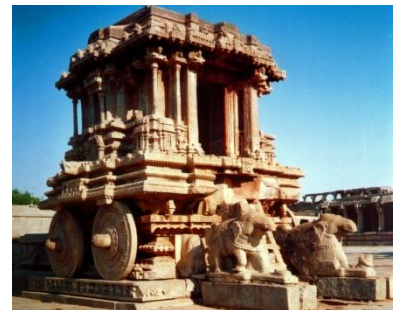

- (A) Sardar Vallabhbhai Patel
- (B) Lal Bahadur Shastri
- (C) Atal Bihari Vajpayee
- (D) Manmohan Singh
- (E) Inder Kumar Gujral

02. This picture depicts the famous Stone Chariot Temple in Hampi. It was built during the 16th century by an emperor of the Vijayanagara Empire. Who was he?

මෙහි දැක්වෙන්නේ ඉන්දියාවේ හම්පි හි පිහිටා ඇති පුරාණ ගල් රථ දේවාලයයි. මෙය 16 වන ශත වර්ෂයේ දී විජයනගර අධිරාජ්‍යයෙකු විසින් ඉදිකරවන ලද අතර, එම අධිරාජ්‍යයා හඳුනාගන්න.

- (A) Krishnadevaraya
- (B) Achyuta Deva Raya
- (C) Tuluva Narasa Nayaka
- (D) Deva Raya II
- (E) Vira Harihara I

03. The 10th King of the Joseon Dynasty was famously recognized as the most tyrannical ruler in Korean history. He was also considered one of the most handsome kings of the Joseon era and has been portrayed in popular drama series such as Dae Jang Geum, Insu: The Queen Mother, Queen for Seven Days, and Bon Appétit, Your Majesty. Identify this infamous ruler of Joseon.

ජෝසෝන් රාජ වංශයේ දසවන පාලකයා මෙන්ම මුලු කොරියානු ඉතිහාසයේම හමුවන කෲරතම පාලකයා ද ලෙස සැලකෙන ජෝසෝන් රාජධානියේ රජු හඳුනාගන්න.

- (A) Yeongjo of Joseon
- (B) Sukjong of Joseon
- (C) Gwanghaegun of Joseon
- (D) Danjong of Joseon
- (E) Yeonsangun of Joseon

04. Silla was one of the Three Kingdoms on the Korean Peninsula. The 27th monarch of this kingdom was known as the country's first reigning queen and the second female ruler in East Asian history. She was renowned for her great contributions to Buddhist culture and for establishing diplomatic relations with the Tang Dynasty of China. Identify this famous monarch.

කොරියාවේ තුන් රාජධානී අතුරින් එකක් වූ සිල්ලා රාජධානියේ 27 වන පාලකයා මෙන්ම එම රාජධානියේ ප්‍රථම රාජිණිය වූ ද බෞද්ධ සංස්කෘතිය වෙනුවෙන් සුවිශාල සේවයක් ද සිදුකළ රාජ්‍ය පාලිකාව හඳුනාගන්න.

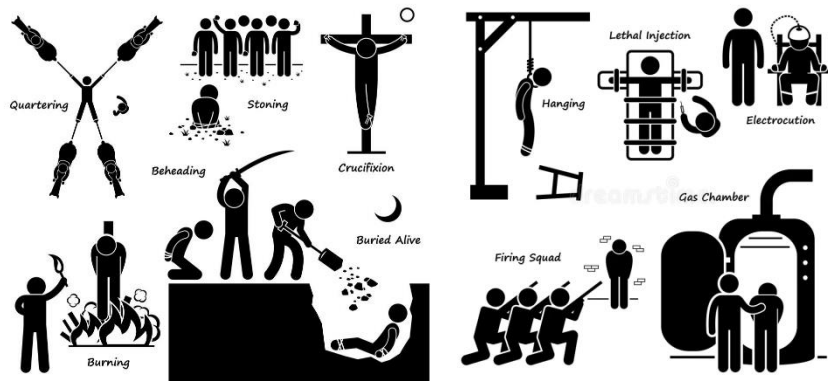

- (A) Jindeok
- (B) Inhyeon
- (C) Seondeok
- (D) Insu
- (E) Myeongseong

05. Capital punishment, also known as the death penalty and formerly called judicial homicide, is the state-sanctioned execution of a person as punishment for actual or alleged crimes. This practice is still carried out around the world in several ways. Which of the following is a Greek originated execution method that was used in ancient times?

මරණ දඩුවම යනු නීත්‍යානුකූලව පුද්ගලයන්ගේ ජීවිතය අවසන් කිරීමේ ක්‍රමවේදයකි. අතීතයේ සිටම විවිධ ක්‍රමවලින් පැවැති මෙය වර්තමානයේ ද ලෝකයේ ක්‍රියාත්මක වෙයි. පහත සඳහන් වරණ අතුරින් ග්‍රීක සම්භවයක් සහිත අතීතයේ දී භාවිතා කරන ලද මරණ දඩුවම් ලබා දීමේ ක්‍රමවේදය කුමක් ද ?

- (A) Guillotine
- (B) Blood Eagle
- (C) Brazen Bull
- (D) Garrote
- (E) Wheel of Catherine

06. Who was the last Romanian communist leader, overthrown and executed by a firing squad during the anti-communist uprisings in Eastern Europe (Romanian Revolutions) in 1989?

රොමේනියානු විප්ලව සමයේ දී බලයෙන් පහකොට මරා දමන ලද රොමේනියාවේ කොමියුනිස්ට් නායකයා කවුරුන්ද ?

- (A) Nicolae Ceaușescu
- (B) Nikolai Alexandrovich
- (C) Fernando Maximiliano
- (D) Oliver Cromwell
- (E) Edward Plantagenet

07. The sultans of the Ottoman Empire, all belonging to the Ottoman dynasty, ruled over the transcontinental empire from its establishment in 1299 until its dissolution in 1922. Who was the only Sultan of the Ottoman Empire to ascend the throne twice and who also led the conquest of Constantinople?

කොන්ස්තන්තිනෝපලය යටත් කරගැනීම මෙන්ම ඔටෝමාන් අධිරාජ්‍යයේ දෙවතාවක් බලයට පැමිණීම සම්බන්ධයෙන් කීර්තියට පත් ඔටෝමාන් සුල්තාන්වරයා කවුරුන්ද ?

- (A) Suleiman I
- (B) Mehmed II
- (C) Osman II
- (D) Murad IV
- (E) Ahmed I

08. Valide Sultan was the title held by the mother of a reigning Sultan of the Ottoman Empire. In Ottoman history, there were only two sultanas fortunate enough to hold the title of Valide Sultan for two of their sons. One of them was Kösem Sultan, a key figure during the “Sultanate of Women.” Who was the other sultana who became Valide Sultan twice, during the reigns of Sultan Mustafa II and Sultan Ahmed III?

ඔටෝමාන් ඉතිහාසයේ දෙවතාවක් මවු රැජිණ වීමට වරම් ලද සුල්තානාවරියන් සිටිනුයේ දෙදෙනෙකු පමණි. එක් අයෙක් කොසාම් සුල්තාන් වන අතර එසේ වරම් ලද අනික් සුල්තානාවරිය කවුරුන්ද ?

- (A) Ayşe Hafsa Sultan
- (B) Safiye Sultan
- (C) Turhan Sultan
- (D) Gülnuş Sultan
- (E) Rahime Perestu Sultan

09. The Egyptian pyramids are ancient masonry structures located in Egypt. The first pyramid was built during the 3rd Dynasty of the Old Kingdom. It was designed, possibly by Imhotep, who served as the chancellor to the king and the high priest of the sun god Ra. What is the name of this first pyramid of Egypt?

ඊජිප්තුවේ ඉදිකරන ලදැයි සැලකෙන ප්‍රථම පිරමීඩය පහත ඒවා අතුරින් කුමක් ද ?

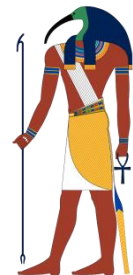

- (A) Red Pyramid
- (B) Great Pyramid of Giza
- (C) Pyramid of Djoser
- (D) Black Pyramid
- (E) Pyramid of Khendjer

10. Ancient Egyptian deities were the gods and goddesses worshipped in ancient Egypt. The beliefs and rituals surrounding these deities formed the core of ancient Egyptian religion, which emerged in prehistory. Which god was worshipped as the god of the Moon, wisdom, knowledge, writing, hieroglyphs, science, magic, art, and judgment?

පුරාණ ඊජිප්තුවාසීන් සඳ, ප්‍රඥාව, දැනුම, ලිවීම, රූපාක්ෂර, විද්‍යාව, මායාකර්ම, කලාව සහ විනිශ්චය යන ඒවාට අධිපති දෙවියන් ලෙස සළකන ලද්දේ කවුරුන්ද ?

- (A) Anubis
- (B) Thoth
- (C) Osiris
- (D) Hathor
- (E) Amun

11. In 1952, after the death of His Majesty King George VI of the United Kingdom, a special code was used by officials to communicate the news. Which of the following was it?

ක්‍රි.ව. 1952 දී එක්සත් රාජධානියේ සයවැනි ජෝර්ජ් රජුගේ අභාවයෙන් පසු රජයේ විශේෂ බලධරයන් රජුගේ මරණයේ පණිවිඩය දැන්වීම සඳහා විශේෂ කේත පද බණ්ඩයක් යොදාගන්නා ලදී. පහත ඒවා අතුරින් එම කේතය කුමක් ද ?

- (A) "May Day"
- (B) "Hyde Park Corner"
- (C) "The Eagle has landed"
- (D) "London Bridge is down"
- (E) "Oh dear Georgie"

12. In 1485, during the Wars of the Roses, a battle took place between King Richard III of the House of York and Henry Tudor. King Richard III was killed on the battlefield, and Henry Tudor was crowned King of England, founding the House of Tudor. What is the name of this battle?

ක්‍රි.ව. 1485 රෝස කුසුම් සංග්‍රාමයේ කොටසක් ලෙස, එංගලන්තයේ තුන්වැනි රිචඩ් රජු හා හෙන්රි ටියුඩර් සාම්වරයා අතර ඇති වූ යුද්ධයෙන් රිචඩ් රජු මියගොස් හෙන්රි ටියුඩර් එංගලන්තයේ රජු ලෙස අභිෂේක ලැබීය. මෙම යුද්ධයේ නම කුමක් ද ?

- (A) Battle of Worcester
- (B) Battle of the Bosworth Field
- (C) Battle of Hopton Heath
- (D) Battle of Nasby
- (E) Battle of Dunbar

13. Wolfgang Amadeus Mozart (1756–1791) was a prolific and influential composer of the Classical period. Despite his short life, his rapid pace of composition and mastery from an early age resulted in more than 800 works, representing nearly every Western classical genre of his time. Which of the following is not a composition by W. A. Mozart?

පහත සඳහන් වරණ අතුරින් වුල්ෆ්ගැං අමේඩියස් මොසාට්ගේ නිර්මාණයක් නොවන වරණය තෝරන්න.

- (A) The Magic Flute
- (B) Symphony No. 41
- (C) The Marriage of Figaro
- (D) The Turkish March
- (E) The Flower Duet

14. Patriotism is the feeling of love, devotion, and a sense of attachment to one's country. This attachment may involve pride in a nation's language, culture, history, or political ideals. To express this patriotism, many cultures have created patriotic songs. Which of the following is an Italian patriotic song?

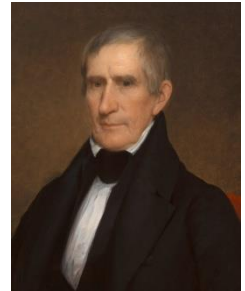

මේ අතුරින් ඉතාලි දේශාභිමානී ගීතයක් ලෙස සැළකෙන්නේ කුමක් ද ?

- (A) Erika
- (B) Bella Ciao
- (C) Auld Lang Syne
- (D) By the Rivers of Babylon
- (E) Matushka

15. The President of the United States (POTUS) serves as both the head of state and head of government of the country. Several U.S. Presidents have passed away while still in office. Who was the first U.S. President to die during his tenure?

එක්සත් ජනපද ඉතිහාසයේ ප්‍රථම වරට, සිය ධුරය දරමින් සිටින අතරතුර දීම අභාවප්‍රාප්ත වූ එක්සත් ජනපද ජනාධිපතිවරයා කවුරුන් ද?

- (A) William Henry Harrison
- (B) James Abram Garfield
- (C) Abraham Lincoln
- (D) William McKinley
- (E) Warren Gamaliel Harding

16. A state banquet is an official banquet hosted by the head of state in their official residence for another head of state, or sometimes head of government, usually as part of a state visit or diplomatic conference. Which U.S. President hosted the most state banquets in U.S. history? During his tenure, the President of Sri Lanka was also invited for a state visit and it recorded as the only official state visit to the U.S. by a Sri Lankan President throughout the history.

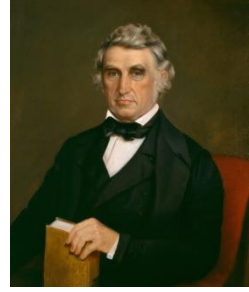

එක්සත් ජනපද ඉතිහාසයේ වැඩිම නිල රාත්‍රී භෝජන සංග්‍රහ ප්‍රමාණයක් පවත්වා ඇති එක්සත් ජනපද ජනාධිපතිවරයා කවුරුන් ද ?

- (A) James K. Polk
- (B) Ronald Reagan
- (C) William Clinton
- (D) Donald Trump
- (E) Joseph Biden

17. During the 18th and 19th centuries, the field of medicine underwent a revolutionary transformation around the world. In the 1820s, a U.S. Army doctor discovered the role of gastric acid in human digestion after observing the stomach of a patient who had survived a gunshot wound. This discovery marked a turning point in the understanding of human digestion, and the doctor became known as the “Father of Gastric Physiology.” Identify this individual.

ආන්ත්‍රික වෛද්‍ය විද්‍යාවේ පියා ලෙස සැලකෙන මානව ආහාර ජීර්ණය සම්බන්ධයෙන් ලොවට තොරතුරු හෙළිකළ ඇමරිකානු ජාතික වෛද්‍යවරයා කවුරුන් ද ?

- (A) Sir William Bowman
- (B) William Harvey
- (C) William Beaumont
- (D) Theophrastus von Hohenheim
- (E) Sir Alexander Fleming

18. Who was the Royal chief guest to participate in Sri Lanka's first Train Journey from Colombo to Ambepussa on December 27, 1864, where he boarded the Train from Veyangoda?

ශ්‍රී ලංකාවේ ප්‍රථම දුම්රිය ගමන වූ කොළඹ සිට අම්බප්පාස්ස දක්වා වූ දුම්රිය ගමනට එක් වූ රාජකීය ආරාධිතයා කවුරුන් ද ?

- (A) Prince Edward, Prince of Wales
- (B) King William III of Netherlands
- (C) Crown Prince Leopold of Belgium
- (D) Prince Felipe of Spain
- (E) Princess Elizabeth of United Kingdom

19. Eelam War IV is the name given to the fourth and final phase of armed conflict between the Sri Lankan military and the separatist Liberation Tigers of Tamil Eelam (LTTE). When did the Eelam War IV officially launch?

ශ්‍රී ලංකාවේ සිවුවන ඊළාම් යුද්ධය නිල වශයෙන් ආරම්භ වූයේ කවදා ද ?

- (A) 26 July 2006
- (B) 19 November 2005
- (C) 18 May 2009
- (D) 22 February 2002
- (E) 19 April 1995

20. The Kingdom of Gampola or Gangasiripura was one of the ancient polities in dynastic Sri Lanka. Who was the first monarch of this kingdom, who also belonged to the House of Siri Sanga Bo?

ගම්පොළ රාජධානියේ ආරම්භක පාලකයා කවුරුන් ද?

- (A) Parakramabahu VI
- (B) Buwanekabahu IV
- (C) Mahinda V
- (D) Gajabahu II
- (E) Jayabahu II

යන්නෝති තැනටම ගිහින් නවත්තන්න. යන හැම තැනකම දිනල ම එන්න.
~ ප්‍රමුඛ අයිශා

Answer Script

- 01.(C) Atal Bihari Vajpayee
- 02.(A) Krishnadevaraya
- 03.(E) Yeonsangun of Joseon
- 04.(C) Seondeok
- 05.(C) Brazen Bull
- 06.(A) Nicolae Ceaușescu
- 07.(B) Mehmed II
- 08.(D) Gülnuş Sultan
- 09.(C) Pyramid of Djoser
- 10.(B) Thoth
- 11.(B) "Hyde Park Corner"
- 12.(B) Battle of the Bosworth Field
- 13.(E) The Flower Duet
- 14.(B) Bella Ciao
- 15.(A) William Henry Harrison
- 16.(B) Ronald Reagan
- 17.(C) William Beaumont
- 18.(C) Crown Prince Leopold of Belgium
- 19.(A) 26 July 2006
- 20.(B) Buwanekabahu IV

SCOPTEX '25
Final Phase
Round 01

01. Which element is considered the most dense element in the periodic table ?

නූතන ආවර්තිතා වගුවේ ඇති සන්තතිවයෙන් වැඩිම මූලද්‍රව්‍ය ලෙස සැලකෙන්නේ කුමක් ද ?

02. What is the most electrically conductive metal in the periodic table ?

ආවර්තිතා වගුවේ ඇති විද්‍යුත් සන්නායකතාවයෙන් වැඩිම මූලද්‍රව්‍ය කුමක් ද ?

03. What is the largest bone in the human body?

මිනිස් ශරීරයේ පවතින විශාලතම අස්ථිය කුමක් ද ?

04. Which is the smallest organ in the human body by weight?

ස්කන්ධය අනුව මිනිස් ශරීරේ ඇති කුඩාම අවයවය කුමක් ද ?

05. What is the special SI unit used to measure radioactivity?

විකිරණශීලීතාවය මිනුම් කිරීමට යොදාගැනෙන අන්තර්ජාතික සම්මත ඒකකය කුමක් ද ?

06. What is measured by the SI unit Siemens?

සිමන්ස් නම් අන්තර්ජාතික සම්මත ඒකකය මගින් මිනුම් කරන්නේ කුමක් ද ?

07. Who is known as the father of immunology?

ප්‍රතිශක්තිකරණ විද්‍යාවේ පියා ලෙස සැලකෙන්නේ කවුරුන් ද ?

08. Who is known as the father Taxonomy ?

තක්සෝනකරණයේ පියා ලෙස සැලකෙන්නේ කවුරුන් ද ?

Answers

- 01. Osmium (Os) / ඔස්මියම්**

Important:

- Answer all questions in a separate sheet of paper.
- After answering, attach the answer script to this question paper and hand it over to the quizmasters.
- For each correct answer, 5 points will be added; for each wrong answer, 2 points will be deducted; and for each blank answer, 3 points will be deducted.
- Any kind of external support or using resources while answering is strictly prohibited.

01. Who invented the “Printing Press” in 1440 A.D.?
02. What was the major method of capital punishment (death penalty) used for nobles (Radala) during the Kandyan era when they committed high treason against the crown?
03. Who was the last Emperor of Imperial Russia?
04. What is the capital city of the Kingdom of Thailand?
05. What is the city in Sri Lanka famously known as the “Gem City”?
06. What is the basic structural and functional unit of life?
07. According to the International System of Units (SI), what is the standard unit for temperature?
08. Who was the Polish female Scientist who discovered the radioactive elements, Polonium (Po) and Radium (Ra)?
09. Name the founder and the owner of Space Exploration Technologies Corp. which is also famously regarded as SpaceX.
10. What is the name of the virtual assistant used in Apple Inc. products, including iPhones?
11. “Doovillen sadunu liye”, “Batha ka iwarayi”, “Hemin sare”, “Udumbara”, and “Anduru kutiya thula” are some of the famous Sinhala songs from 1980s and 1990s. Who was original music composer of these masterpieces?
12. “The Magic Flute”, “The Requiem”, “The Marriage of Figaro”, and “Eine Kleine Nachtmusik” are some the famous classical period music compositions. Identify the music composer, who created these music pieces, and also famously known as the “Child Prodigy”?

13. Who was the original creator of the world-renowned fictional detective character Sherlock Holmes?
14. Which famous festival, previously known as “Samhain”, is nowadays celebrated in western countries to mark or celebrate the dead?
15. “Kohombayakkankariya” is a traditional dancing ritual in Sri Lanka. To which dancing tradition does this ritual belong?
16. What term is used to refer to zero (0) in tennis scoring?
17. Which sport is considered as the National Sport of Japan?
18. Who was the co-creator of the video game Call of Duty who died in a car crash in December 2025?
19. In which **city** will the 2028 Summer Olympic Games be held?
20. In which year did Sri Lanka win the ICC Cricket ODI World Cup?

Answer Script

01. Johannes Gutenberg/Gutenberg/Johannes
02. Decapitation/Beheading/නිස ගසා දැමීම/නිස කපා දැමීම
03. Nicholas II/Nicholas Tsar/Nikolai Alexandrovich Romanov
04. Bangkok
05. Rathnapura
06. The Cell/මෙසලය
07. Kelvin/K
08. Marie Curie/Maria Salomea Sklodowska Curie
09. Elon Musk/Elon Reeve Musk

01. This organ is found in almost every vertebrate and primarily acts as a blood filter. It also plays a crucial role in the immune system and can be categorized as part of the lymphatic system. The key functions of this organ are to remove old and damaged red blood cells and to produce white blood cells to fight infections. It is considered a non-essential organ for survival because its functions can be taken over by other organs, such as the liver, in cases of its removal. This organ is located in the upper left quadrant of the abdominal cavity. Identify this organ.

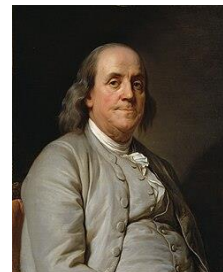

02. Seismic stations are defined as locations equipped to monitor and record seismic activity and are selected to provide optimal global coverage. In the Sri Lankan context, there are four main seismic stations situated across the island. Mahakanadarawa (MALK), Hakmana (HALK), and Buddangala (BULK) are three of these stations. What is the other seismic station located in Sri Lanka that was established in 2000?

03. The International System of Units, internationally known by the abbreviation SI, is the modern form of the metric system and the world's most widely used system of measurement. The SI is coordinated by the International Bureau of Weights and Measures, abbreviated as BIPM from French. There are seven SI base units used in measurement. From that, what is the SI unit for luminous intensity?

04. NASA is planning to launch the second flight of the Space Launch System (SLS) under the Artemis Programme. This mission is planned for 7 March 2026 and will be a 10 day crewed lunar flyby mission. Name this planned lunar spaceflight mission.

05. This scientist is famous for his discoveries related to the lightning rod and the well-known kite experiment. He was also a Founding Father of the United States, a drafter, and a signer of the Declaration of Independence. He served as the first Postmaster General of the United States and as the first President of the University of Pennsylvania. Identify this renowned American polymath.

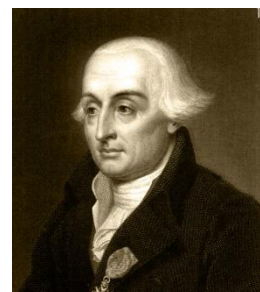

06. There are 118 elements in the modern periodic table. One of them has an atomic number of 31 and belongs to the boron group. It was discovered by the French scientist Paul-Émile Lecoq de Boisbaudran in 1875 and was named after the Latin name of his homeland. Identify this element, which can melt in the human hand.

07. The AK-47 is an assault rifle chambered for the 7.62×39 mm cartridge. It was developed in the Soviet Union in 1947 by a Russian small-arms designer. It is renowned worldwide for its rugged reliability, low production cost, and ease of use. A smaller and more modern version of this rifle was developed by the same designer in 1974 and was named the AK-74. Name this Russian inventor, military engineer, and lieutenant general in the Russian Army who designed these firearms.

08. Siri is a virtual assistant and chatbot developed and popularized by Apple. It uses voice queries, gesture-based control, focus tracking, and a natural language user interface to answer questions, make recommendations, and perform actions by delegating requests to a set of Internet services. The original American female voice of Siri was recorded in July 2005. Who was the voice actress behind this voice?

09. A skull fracture is a break in one or more of the eight bones that form the cranial portion of the skull, usually occurring as a result of blunt force trauma. What type of skull fracture crosses the base of the skull transversely, involves the temporal and sphenoid bones, and typically occurs in crushing injuries, such as when the head is compressed between two heavy objects?

10. This scientist was an 18th-century mathematician born in Turin, in the Kingdom of Sardinia (modern-day Italy). He made significant contributions to the fields of analysis, number theory, and both classical and celestial mechanics. Identify this mathematician who made groundbreaking contributions to classical mechanics and is best known for formulating equations that describe the motion of systems using generalized coordinates.

11. Water is an inorganic compound with the chemical formula H_2O . It is a transparent, tasteless, odorless, and nearly colorless chemical substance. The maximum density of pure water is approximately 1 g/cm^3 or 1000 kg/m^3 . At what temperature does water have its maximum density? Indicate the answer in degrees Celsius.

12. Sea turtles (superfamily Chelonioidea), sometimes called marine turtles, are reptiles of the order Testudines and the suborder Cryptodira. As an island nation, Sri Lanka is also gifted with these remarkable creatures in its marine environment. How many species of sea turtles can be found in Sri Lankan waters?

13. The Bell 212 (also known as the Bell Two-Twelve) is a two-blade, twin-engine, medium helicopter that first flew in 1968. This aircraft has recently gained public attention due to several accidents in the past few years, including a helicopter crash that resulted in the death of Iranian President Ebrahim Raisi, as well as accidents near Maduru Oya and Gin Oya involving helicopters operated by the Sri Lanka Air Force. What is the passenger capacity of this aircraft?

14. Chlorine is a chemical element with the symbol Cl and atomic number 17. It is the second-lightest of the halogens and appears between fluorine and bromine in the periodic table, with properties mostly intermediate between them. Chlorine was recognized as an element by a British chemist in 1808. Who was this chemist, who is also famous for inventing the safety lamp?

15. In mathematics and computer science, an algorithm is a finite sequence of mathematically rigorous instructions, typically used to solve a specific class of problems or to perform a computation. Algorithms are used as specifications for performing calculations and data processing. Which famous algorithm in computer science, conceived by a Dutch computer scientist in 1956, is used to find the shortest path between two nodes?

16. C is a general-purpose programming language created in the 1970s by an American computer scientist. By design, C gives the programmer relatively direct access to the features of a typical CPU architecture, customized for the target instruction set. Name the computer scientist who created this programming language.

17. Andrology is the medical specialty that deals with male health, particularly problems of the male reproductive system and urological issues unique to men. There is a medical condition called Undescended Testis (UDT), which refers to the failure of one or both testicles to descend into the scrotum. What is the medical term used to describe this condition, derived from Greek?

18. A Venn diagram is a widely used diagram style that shows the logical relations between sets, popularized by John Venn in the 1880s. In 1866, Venn published a groundbreaking book that espoused the frequency theory of probability, arguing that probability should be determined by how often an event is expected to occur rather than by “educated” assumptions. Name that book.

19. When two fluid layers move relative to each other, a frictional force develops between them, and the slower layer acts to slow down the faster layer. What is this internal resistance to flow called, which is described by a fluid property?

20. A volcano is commonly defined as a vent or fissure in the crust of a planetary-mass object, such as Earth, that allows hot lava, volcanic ash, and gases to escape from a magma chamber below the surface. There are several types of volcanoes. Which type of volcano has a low profile with broad, gently sloping domes, typically erupts effusively, and includes Mauna Loa in Hawaii?

21. The Macdonald triad (also known as the triad of sociopathy or the homicidal triad) is a set of three factors, the presence of any two of which is considered predictive of, or associated with, violent tendencies, particularly in relation to serial offenses. Two of these factors are cruelty toward animals and an obsession with fire-setting. What is the third factor of this triad?

22. OCD is a mental disorder in which an individual experiences intrusive thoughts (obsessions) and feels the need to perform certain behaviors (compulsions) repeatedly to relieve the distress caused by these obsessions, often to the extent that it impairs daily functioning. What does the abbreviation OCD stand for?

23. The Komodo dragon (*Varanus komodoensis*) is a large reptile of the monitor lizards (Varanidae) family. What is the country that uses the Komodo Dragon as their national animal symbol?

24. A guillotine is an apparatus designed for carrying out executions by beheading. The device consists of a tall, upright frame with a weighted, angled blade suspended at the top. Which scientific principle can be used to describe the free fall of the blade?

25. The Black Death was a plague pandemic that occurred in Europe from 1346 to 1353. It was one of the most fatal pandemics in human history; as many as 50 million people may have died, possibly around 50% of Europe's 14th-century population. This pandemic was caused by a bacterium that was spread through fleas. Name this bacterium.

26. This Sri Lankan scientist is well known for his research on Quantum Well Infrared Photodetectors and infrared imaging technology. He is a senior research scientist and group supervisor at NASA's Jet Propulsion Laboratory. He was awarded the Sri Lanka Ranjana by President Maithreepala Sirisena in 2017 and the Nalanda Keerthi Sri award from his alma mater in 2006. Identify this world-renowned solid state physicist from Sri Lanka.

27. This is a species of elapid snake endemic to Sri Lanka. It is found in the central lowlands of the country, including areas such as Wasgamuwa and Rattota. The dorsum is banded, while

the venter is bright red, with red pigmentation extending laterally and a bluish coloration on the underside of the tail. Identify this snake species, which is theoretically considered to be venomous.

28. Deshamanya Philip Revatha Wijewardene, better known as Ray Wijewardene, was a Sri Lankan engineer, aviator, inventor, and Olympic athlete. He was an expert on tropical agriculture and natural resource management, subjects that he developed a logical system to study. He was famous for the invention of the two-wheeled tractor and was awarded Vidya Jyothi — the highest national honour for science in Sri Lanka — by the Sri Lankan government for outstanding scientific and technological achievements. In which year did he receive this award?

29. A phobia is an anxiety disorder defined by an irrational, unrealistic, persistent, and excessive fear of an object or situation. Phobias typically result in a rapid onset of fear and are usually present for more than six months. What is the psychological term used to describe the fear of beautiful women?

30. Digital imaging, or digital image acquisition, is the creation of a digital representation of the visual characteristics of an object, such as a physical scene or the internal structure of an object. In digital imaging, what is the term used to describe the smallest addressable element in a raster image, or the smallest addressable element in a dot-matrix printer or display device?

01. This artwork was created by an Austrian-born artist in 1912. It depicts the Vienna State Opera. His preferred subject matter was primarily architecture, and his artistic style was strongly influenced by Greco-Roman classicism, the Italian Renaissance, and Neoclassicism. In 1925, he wrote an autobiography and later entered politics. Who is this world-renowned artist?

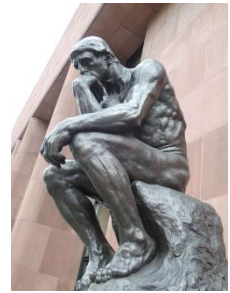

02. Snails are eaten by humans in many regions such as Africa, Southeast Asia, and Mediterranean Europe, while in other cultures they are considered a taboo food. What French dish is commonly served as an appetizer and is prepared using land snails cooked in their shells with a rich garlic, parsley, and butter sauce?

03. **[Audio]** This song (Udara Mawbima) was performed by a Sri Lankan musician and singer who was a legend in Sri Lankan folk music. Identify this great Sri Lankan musician who passed away in 2002.

04. **[Audio]** The "Radetzky March," Op. 228, is a march composed by an Austrian composer of the Romantic period. It was first performed on 31 August 1848 in Vienna to celebrate the victory of the Austrian Empire, under Field Marshal Joseph Radetzky von Radetz, over the Italian forces at the Battle of Custoza during the First Italian War of Independence. Name this composer.

05. The Thinker is a bronze sculpture depicting a nude male figure of heroic size, seated on a large rock, leaning forward, with his right elbow placed upon his left thigh and the back of his right hand supporting his chin, in a posture evocative of deep thought and contemplation. This bronze casting was made in 1904 and is now exhibited at the Musée Rodin in Paris. Who was the artist of this masterpiece?

06. Modern Family is an American television sitcom broadcast on ABC. It aired for 11 seasons, from September 23, 2009, to April 8, 2020. The series follows the lives of three diverse but interrelated families living in suburban Los Angeles. One of the creators of the show was Christopher Lloyd; who was the other creator?

07. The Sri Lankan Parliament Complex is a public building and landmark that houses the Parliament of Sri Lanka. • Science and Technology

61. Discovered by the Indian-American theoretical physicist Subrahmanyan Chandrasekar in 1930, this limit is the maximum mass a stable white dwarf can have, which is approximately 1.44 times the mass of the sun. This limit signifies that white dwarf exceeding this mass will collapse under gravity, usually triggering a type Ia supernova or becoming black holes. What is the name given to this limit?

Chandrasekhar limit

62. Vitamin B2 is a vitamin found in food, and it also sold as a dietary supplement. It is also essential to form the coenzymes, energy metabolism, cellular respiration and antibody production. Main sources of this vitamin are dairy products, meat and enriched vegetables. What is the chemical name of Vitamin B2? **Riboflavin**

63. Proposed in 1937 by Lothar Collatz, this conjecture is one of the most famous unsolved problems in mathematics. It concerns sequences of integers in which each term is obtained from the previous term as follows; If a term is even, the next term is half of it. If the term is odd, the next term is 3 times the previous term plus 1. The conjecture is that these sequences always reach 1, no matter which positive integer is chosen to start the sequence. What is the name of this conjecture, where a general proof has not yet been established? **Collatz Conjecture**

64. Discovered by Marguerite Perey in 1939, this element is extremely rare in nature. It is the second most electropositive element behind only caesium, and it appears as a soft, silvery-white metal, likely existing as a solid at room temperature. Identify this

radioactive element which has the atomic number 87, whose name is derived from the nationality of its discoverer. **Francium**

65. Also known as the zebra giraffe, this animal is an artiodactyl mammal that is endemic to the northeast Democratic Republic of Congo in central Africa. The specialty of the animal is that it looks like a mix of a zebra and a giraffe as it has zebra like striped hind legs and a head shape like a giraffe. What is the commonly used name to identify this animal? **Okapi (*Okapia johnstoni*)**

66. Released in 2022, ChatGPT is a generative artificial intelligence chatbot developed by OpenAI. The service gained 100 million users within just two months, making it the fastest growing consumer software application in the history. What do the three letters GPT stand for in ChatGPT? **Generative Pre-trained Transformer**

67. Identify this Russian organic chemist who lived in the 1800s, best known for proposing the law named after him, that state when a hydrogen halide or water is added to an unsymmetrical alkene, the hydrogen atom attaches to the carbon with more hydrogen atoms are bonded. He was nominated for the Nobel Prize in Chemistry in 1902. **Vladimir Markonnikov**

68. Biologists newly discovered and described an organelle present in mammalian cells including the human cells, using cryo-electron tomography in May 2025. It consists of two heterotypic vesicles, sharing a stable and extended membrane surface and it functions as a recycling centre helping to form multivesicular bodies and manage vesicular cargo, often acting as a middle-step for sorting materials. What is the name of this newly discovered organelle? **Hemifusome**

69. Launched by NASA in August 2018 aboard a Delta IV Heavy rocket, this spacecraft was designed to travel closer to the sun than any previous mission. During its closest approaches, it comes within about 62 million kilometres of the sun's surface and reaches speeds of roughly 700,000 km/h, making it the fastest human-made object in history. In 2021, it became the first spacecraft to enter the sun's outer atmosphere, known as the corona. Name this spacecraft. **Parker Solar Probe**

70. Following Android 15's internal codename 'Vanilla Ice Cream', instead of continuing with a dessert starting with the letter 'W' google began a new, shorter naming cycle by internally codenaming the Android 16 by a dessert starting from a letter among the first 10 letters of the English alphabet. Identify this dessert. **Baklava**

• History and Geography

71. The national flag consisting of the highest number of colours which is 12. The flag belongs to the only Central American country where English is the official language. What is the name of the country which this flag belongs to? **Belize**

72. The person shown on the picture is a former sultan and military commander of the Mamluk sultanate in Egypt and Syria. He is best known for defeating the French army in the seventh crusade and defeating Hulagu Khan's Mongol forces in the battle of Ain Jalut, bringing the first defeat to the Mongol forces in 1260, also preventing Mongols entering Western Europe. The characters known as the "Three Investigators" are three boys named Jupiter Jones, Peter Crenshaw, and Bob Andrews. Who was the author of this famous juvenile novel series?

23. Hotel Transylvania is an American media franchise created by Todd Durham and owned by Sony Pictures Entertainment. It consists of four animated feature films, three short films, an animated television series, and several video games. One of the main characters is Mavis Dracula, who is

depicted as the only daughter of Count Dracula. Which famous pop star acts as the voice artist for Mavis Dracula?

24. This classical Indian dancing style originated from a northeastern Indian region which is close to Myanmar. The origin of this dancing tradition is credited to a king who ruled this area in the 18th century, called Bhagyachandra (also known as Rajarshi Bhagyachandra). Identify this spectacular classical Indian dancing tradition.

25. **[Audio]** This song is sung by an American artist known as Stefani Joanne Angelina Germanotta. She is considered one of the best-selling music artists of all time. She was the first person to win an Academy Award, BAFTA Award, Golden Globe Award, and Grammy Award in one year. She also starred in movies like House of Gucci in 2021 and TV series like Wednesday in 2025. Give the professional name of this pop star who was once credited as the most powerful pop star in 2014.

Answer Script

01. Vasily Vasilyevich Vereshchagin / Vasily Vereshchagin
02. Adolf Hitler
03. Calvin Richard Klein / Calvin Klein
04. Rino Barillari
05. Prof. Ediriweera Sarachchandra
06. Narasimha
07. Pope Tawadros II of Alexandria / Pope Tawadros II
08. Mukbang
09. University of Wayamba
10. Daniel Chong
11. Kokila Wannama / කේකිල වන්නම
12. ජාතික රූපවාහිනිය / Sri Lanka Rupavahini / SLRC
13. Gillian Anderson
14. 6th Lane
15. Nooran Sisters / Sultana & Jyoti Nooran
16. The Enid Blyton Secret Series
17. Pyotr Ilyich Tchaikovsky
18. Roberto Alfonso "Bobby" Farrell / Bobby Farrell
19. Sarath de Alwis
20. Ramin Djawadi
21. Gian Lorenzo Bernini
22. Robert Arthur Jr.
23. Selena Marie Gomez / Selena Gomez
24. Manipuri
25. Lady Gaga

Practice Paper for MQT (2026/27)

Science & Technology

Time: 15 minutes

Level: Master/Pro

Name:

Membership code: MRC/GKC/...../.....

Class:

Marks:/100

Important:

- Answer all questions in a separate sheet of paper.
- Any kind of external support or using resources while answering is strictly prohibited.

01. A phobia is an anxiety disorder defined by an irrational, unrealistic, persistent, and excessive fear of an object or situation. Phobias typically result in a rapid onset of fear and are usually present for more than six months. What is the psychological term used to describe the fear of kissing?

02. In naval terminology, a class of submarines can be defined as a group or family of submarines that share the same purpose, design, and technology. This particular class of submarines was designed in 1976 and has been in commission since 1981. It is approximately 170 meters in length and has a test depth of more than 800 feet. Identify this class of submarines operated by the United States Navy.

03. This Russian-born American physicist is world-renowned for her engaging teaching style and spectacular demonstrations of physics and chemistry. Her performances have captivated high school and college students around the world through both live demonstrations and virtual platforms. In 2009, she co-authored the book Atmospheric Thermodynamics: Elementary Physics and Chemistry. Identify this scientist.

04. The periodic table has 118 elements. Among them is a d-block element that belongs to Group 9. It is a hard, lustrous, somewhat brittle, gray metal. When hydrated at room temperature, its 2+ ion forms a pink-coloured complex. Its name may derive from a household

spirit in German folklore. It was first identified in 1753 by the Swedish chemist and mineralogist Georg Brandt. Identify this metal element with the shell electron configuration 2, 8, 15, 2.

05. This Sri Lankan-born ecologist is known for his book *Snakes of Sri Lanka*, whose first edition was published in 2006 and second edition in 2023. He currently works as a Principal Scientist at the Stantec in Australia and as an Adjunct Associate Professor at Murdoch University. He has also become popular for his YouTube series titled “Yan Saththu Balanna”, which presents simple scientific documentary-style content for Sri Lankan audiences. Identify this Sri Lankan scientist.

06. In photometry, illuminance is the total luminous flux incident per unit area on a surface. It measures how much the incident light illuminates a surface, with wavelengths weighted by the luminosity function to match human brightness perception. The device used to measure illuminance is called an illuminance meter. What is the standard unit used to measure illuminance in scientific calculations?

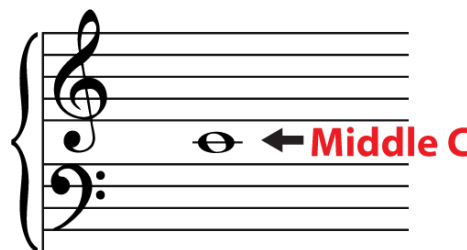

07. This is a prominent Sri Lankan zoologist, paleontologist and artist, who served as the Director of the National Museum of Ceylon from 1939-1964. His fossil and species descriptions, which received global recognition, include those on the prehistoric Balangoda Man, the extinct Sri Lankan lion, and the extinct Sri Lankan hippopotamus. His contribution to the field has been immortalized in the scientific names of three species of Sri Lankan reptiles. Who is this multitasking Sri Lankan?

08. ASMR is a tingling sensation and a pleasant form of paresthesia that usually begins on the scalp and moves down the back of the neck and upper spine. It has been compared with synesthesia and may overlap with frisson. ASMR is a subjective experience of “low-grade euphoria,” characterized by “a combination of positive feelings and a distinct static-like tingling sensation on the skin.” What does the acronym ASMR stand for in medical terms?

09. Middle C (C4) is the C note closest to the center of a piano keyboard, located immediately to the left of the two-black-key group nearest the middle. On an 88-key piano, it is the fourth C key from the left. It serves as an important reference point for beginners. In standard notation, middle C lies on a ledger line between the treble and bass clefs. Frequency is the number of occurrences of a repeating event per unit of time, and the pitch of every musical note is determined by its frequency. What is the approximate frequency of middle C?

10. The seafloor spreading theory describes a geological process in which new oceanic crust forms at mid-ocean ridges through volcanic activity and moves laterally away from the ridge. In the 1960s, an American geologist proposed this theory based on several lines of evidence, including patterns of Earth's magnetism and the existence of subduction zones. Who was this scientist, who also served as a Navy officer in the United States during World War II?

11. B vitamins, also called the vitamin B complex, are a group of water-soluble vitamins that play key roles in cell metabolism and the synthesis of red blood cells. They are a chemically diverse class of compounds. Dietary supplements that contain all eight are referred to as a vitamin B complex. Individual B vitamins are identified by their B-number or chemical name. What is the chemical name of vitamin B7?

12. The human skull is a bony structure composed of 22 bones that protects the brain, supports facial features, and enables sensory functions such as vision and smell. Within the skull, there are flexible structures that connect the bones firmly. In newborns, these regions are soft and composed mainly of collagen fibers, allowing the skull to deform slightly during childbirth. What is the anatomical term for these structures in adult humans?

13. John Bardeen is an American scientist, and is the only person in history to have won the Nobel prize in Physics twice. The first time he won it, was with the help of 2 other scientists, for the invention of a very important electronic component found in almost every device. What is the name of this component?

14. Principle on Chemical equilibrium used to predict the effect a changing condition has on a system in equilibrium is this French Chemist's greatest accomplishment. He is also a Davy Medal winner awarded by the Royal Society of London for an outstandingly important recent discovery in any branch of chemistry. Name this Chemist.

15. What is the polymer with properties of heat and scratch resistance, non-conductive and nonflexible made from phenol and formaldehyde and became the first plastic made from synthetic components by Leo Baekeland?

16. In modern computing, a device relies on small units called transistors to perform calculations and store data. These devices are built on layers of silicon and are capable of executing billions of instructions per second. The speed and efficiency of these devices have increased drastically over the last few decades, following a famous observation about transistor density doubling approximately every two years. What type

of device is being described here, which forms the core of nearly all personal computers and smartphones?

17. Known as a visionary programmer, she wrote instructions for one of the earliest mechanical computers, translating mathematical ideas into a form machines could follow. Her work is considered the first instance of computer programming, and a major programming language was later named in her honor. Who is this pioneer?

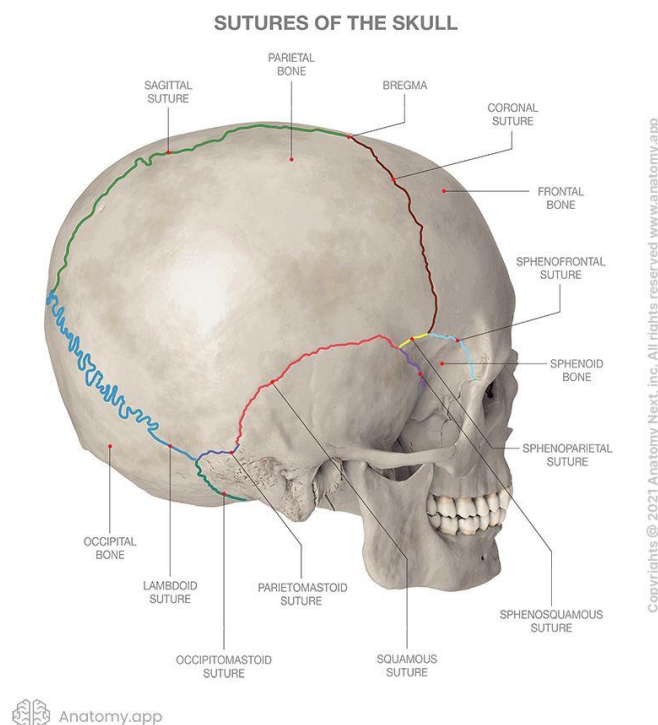

18. The production of sperm is regulated by hormones from the brain. The hypothalamus releases a hormone that signals the anterior pituitary to secrete two key hormones: one that stimulates sperm formation and another that triggers testosterone production. Name the first hormone released by the hypothalamus that starts this chain.

19. This is a small passerine bird in the family Muscicapidae. It is an endemic resident breeder in the hills of central Sri Lanka. Adults are ashy blue, with a whitish belly. A black patch lies between the broad black bill and the eye, bordered with brighter blue above and below. Sexes are similar, but females are slightly duller. Identify this bird species, which is also depicted on the Rs. 50 note of the 11th series issued by the Central Bank of Sri Lanka.

20. Kotakethana murders refer to a series of 18 mysterious murders of women, including three double murders, starting from 2008 in and around Kahawatta, Rathnapura, Sri Lanka. In which year did those three double murders occur?

Answer Script

01. Philemaphobia / Philematophobia
02. Ohio class Submarine
03. Tatiana Lvovna Erukhimova / Tatiana Erukhimova
04. Cobalt / Co
05. Dr. Ruchira Somaweera
06. Lux / lx
07. Dr. P.E.P. Deraniyagala
08. Autonomous Sensory Meridian Response
09. 261.63 Hz / 262 Hz / 256 Hz
10. Harry Hammond Hess
11. Biotin
12. Cranial Sutures
13. Transister
14. Henry Louis Le Chatelier
15. Bakelite
16. Central Processing Unit (CPU)
17. Augusta Ada King, Countess of Lovelace / Ada Lovelace
18. Gonadotropin-releasing hormone / GnRH
19. Dull-blue flycatcher
20. 2012

Current Affairs

01. The 98th Academy Awards ceremony, presented by the Academy of Motion Picture Arts and Sciences (AMPAS), took place on March 15, 2026, at the Dolby Theatre in Hollywood, Los Angeles. Who was the 62-year-old American television host, comedian, and writer who hosted this year's Oscars?

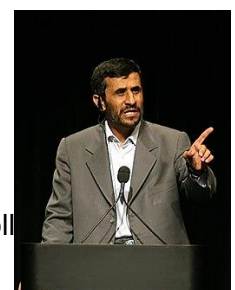

02. Recently, Iran fired two intermediate-range ballistic missiles at a military base in the Indian Ocean. This base has been used as a joint UK–U.S. military facility since the 1970s and is located in the British Overseas Territory of the Chagos Islands. Identify this military base.

03. This is an American martial artist, actor, screenwriter, and author. He held black belts in karate, taekwondo, Tang Soo Do, Brazilian jiu-jitsu, and judo. After serving in the United States Air Force, he won numerous martial arts championships and later founded his own discipline, Chun Kuk Do. Identify this beloved actor who passed away recently.

04. This Iranian politician served as the sixth President of Iran from 2005 to 2013. During his tenure, he was considered one of the closest allies of Sri Lanka due to his strong support during the Sri Lankan Civil War and his role in initiating major projects such as the Uma Oya Multipurpose Development

Project. He also made a significant state visit to Sri Lanka in 2008. Recently, rumours circulated on social media claiming he was killed in a U.S. attack during Middle East tensions, but these reports were later confirmed to be false. Who is this Iranian President?

05. The President of the United States, Donald Trump, recently dismissed the Secretary of Homeland Security from his second cabinet. After the dismissal, Trump announced his intention to appoint her as the United States Special Envoy for the Shield of the Americas, a proposed diplomatic role in his security initiative for the Western Hemisphere. Identify this person who also served as the 33rd Governor of South Dakota.

History & Geography

01. Pharaohs were the divine and absolute rulers of Ancient Egypt. After the death of a pharaoh, Egyptians practiced a special body-preservation process known as Mummification. In 1974, archaeologists transported the mummified body of a pharaoh to France for preservation and scientific examination. Because French law required a valid passport for anyone entering the country; living or dead. Egyptian authorities reportedly issued a passport for the nearly 3,000-year-old mummy, listing his occupation as “King (Deceased).” Who was this famous pharaoh who once ruled Ancient Egypt?

02. This is the official presidential standard of a Sri Lankan President who once held the office of Prime Minister of Sri Lanka. He was first elected to Parliament in the 1965 general election representing the Udunuwara Electoral District and held several cabinet positions under multiple Presidents. His presidency is recorded as one of the shortest in Sri Lankan history. Identify this Sri Lankan President who was also conferred the title of Sri Lankabhimanya by his predecessor.

03. In 1485, a ten-year-old boy was sent to the Tower of London to be imprisoned by order of King Henry VII of England. This boy was a potential claimant to the English throne during the reigns of both King Richard III and King Henry VII. As a result, Henry VII considered him a threat due to political unrest surrounding his claim. After several years of imprisonment, he was eventually sentenced to be beheaded at Tower Hill at around the age of 24. It is said that he was mentally impaired at the time of his execution, and his death marked the end of the House of Plantagenet (also House of York). Identify this person, who was the 17th Earl of Warwick and the brother of the famous Countess Margaret Pole.

04. Aruba, officially the Country of Aruba, is a constituent island country within the Kingdom of the Netherlands, located in the southern Caribbean Sea, 29 kilometres (18 miles) north of

the Venezuelan peninsula of Paraguaná and 80 kilometres (50 miles) northwest of Curaçao. In 1986, Aruba became a constituent country within the Kingdom of the Netherlands and acquired the formal name “Country of Aruba.” What is the capital city and largest city of Aruba?

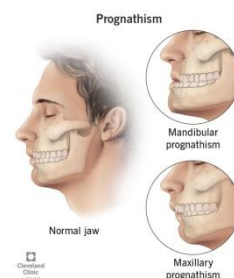

05. The Villisca axe murders occurred during the night of June 9 and the early morning of June 10, 1912, in the town of Villisca in the United States. Six members of the Moore family and two guests were found bludgeoned to death in the Moore residence. All eight victims, including six children, had severe head wounds from an axe. A lengthy investigation yielded several suspects. In which U.S. state is this murder house located?

Science & Technology

01. Calculus is the mathematical study of continuous change, just as geometry is the study of shape and algebra is the study of generalizations of arithmetic operations. Two scientists are credited with the invention of calculus. Identify the 17th-century scientist who laid the foundation for calculus by developing his own mathematical methods to understand the motion of celestial bodies.

02. Prognathism is a positional relationship of the mandible or maxilla to the skeletal base, where either jaw protrudes beyond a predetermined imaginary line in the coronal plane of the skull. This medical condition is often associated with an 11th-century European royal house, which exhibited a large number of cases due to repeated intermarriage within the family. What is the term used to describe this condition when combined with the name of that royal house?

03. In the medical field, doctors specialize in different areas based on their training and practice. What is the term used to describe doctors who specialize in the diseases and medical conditions of children?

04. This gaseous element is the most electronegative element and the lightest halogen in the periodic table. It is usually found as a gas, but in liquid form it appears pale yellow. Its electronic configuration is $[\text{He}] 2s^2 2p^5$. Its common anion is widely used in dental care, but high concentrations in drinking water can lead to health problems such as kidney damage. Identify this halogen, whose existence was proposed by André-Marie Ampère in 1810.

05. This is a flowering plant commonly known as “Angel’s Trumpet.” It can often be seen in highland areas of Sri Lanka as a home-grown ornamental plant. All parts of the plant are highly poisonous and can cause severe medical emergencies or even death. What is the scientific name of this genus?

Art & Culture

01. This famous marble masterpiece, known as “Il Disinganno” (also called “Release from Deception”), was created between 1752 and 1759 for the Cappella Sansevero. It depicts a fisherman being freed from a net by an angel and was carved from a single block of marble. The sculpture is located in the Sansevero Chapel in Naples, Italy. Identify the Italian, Genoese-born sculptor who created this masterpiece.

02. **[Audio]** This song, titled “Wannam Saudam,” is a popular New Year song in Sri Lanka. It is performed by a renowned Sri Lankan artist along with his musical academy. Identify this artist.

03. **[Audio]** This is the theme song of a 1995 English-language fantasy adventure science fiction children’s television series, co-produced between Australia and Poland, and filmed in both countries. In 1997, a sequel series called Land of the Dragon Lord was released. Name this famous TV series also broadcasted in Sri Lanka.

04. **[Audio]** This is a song from a famous Sinhala movie in Sri Lanka. The movie was released in 2012 and directed by Prof. Sunil Ariyaratne. The main actors were the legendary Sri Lankan actor Jackson Anthony and Pooja Umashankar. Identify this well-known Sri Lankan movie, which depicts a Buddhist Jataka tale.

05. **[Audio]** This song is called “The Lion Sleeps Tonight.” It was also referenced in the famous Disney animated movie The Lion King (1994). The song was originally known as “Mbube,” written by a South African musician in 1939. In 1961, an American doo-wop band adapted its melody and added English lyrics to produce this version. Identify this band.

Sports & Games

01. **[Audio]** This is a FIFA song created for the 2014 FIFA World Cup. It was sung by Shakira featuring Carlinhos Brown. Which country hosted the 2014 FIFA World Cup?

02. In 1990 Cameroon became first African country to reach quarter-final of FIFA world cup. This player scored 4 goals in the tournament and also selected to all-star team of the tournament. In 1994 FIFA world Cup he scored a goal against Russia at the age of 42, he became the oldest goal scorer in world cup history. In 2007, he was named by the Confederation of African Football as the best African player of the previous 50 years. Who is this legendary football player? (RQ 17)

03. This chess player holds the record for the longest reign as World Chess Champion, astonishingly retaining the title for 26 years and solidifying their status as one of the greatest

Current Affairs

01. The Gen Z protests are a series of student and youth-led protests and riots that have occurred in several countries during the 2020s. Recent protests in Nepal led to the overthrow of the Nepalese government and ultimately to the 2026 general election. In this election, Nepal elected its youngest prime minister in history, at the age of 35, with a landslide victory. Identify this new Prime Minister of Nepal, who was formerly the Mayor of Kathmandu, a structural engineer, and an ex-rapper.

02. This Canadian-American actress and comedian had a career spanning over 50 years. She passed away on 30 January 2026. She was best known for starring as Kate McCallister, the mother of Kevin McCallister, in the famous children's film Home Alone in 90s. Identify this world-renowned Hollywood star.

03. This Sri Lankan IT engineer, web developer, and software developer, born in the 1980s, became widely known among Sri Lankans for developing an English–Sinhala dictionary software in the early 2000s. This software helped many Sri Lankan personal computer users translate words before advanced digital tools such as Google Translate became popular. The dictionary was named after him and is still used by some PC users today. In recent days, he has been trolled and cyberbullied on social media due to a series of Facebook

posts in which he appeared to brag about his achievements. Identify this Sri Lankan IT engineer. (Full name required)

04. The ongoing Iran–US war is currently affecting the whole world. Many countries that depend on fuel transported through the Strait of Hormuz are now facing a fuel crisis. To address this situation, the Sri Lankan government has taken several measures, including increasing fuel prices. As a result, bus fare rates were also increased by a certain percentage. Effective from 24 March 2026, the National Transport Commission announced a revision of bus fares, which was approved by the Cabinet of Ministers. Accordingly, the minimum bus fare increased from Rs. 27 to Rs. 30. What is the percentage increase in bus fares in Sri Lanka this time?

05. Hannah Kathrine Spencer, also known as “Hannah the Plumber,” is a British politician and tradesperson who has served as the Member of Parliament (MP) for Gorton and Denton since the February 2026 by-election. She is the first member of her party to win a parliamentary by-election and the party’s first MP in the north of England. Name the political party of MP Hannah Spencer.

06. For the first time in England’s history, a female Anglican bishop was elected as the Archbishop of Canterbury. The Archbishop of Canterbury is the senior archbishop and primate of the Church of England and, in this capacity, serves as the bishop of the Diocese of Canterbury, metropolitan of the Province of Canterbury, and ceremonial head of the worldwide Anglican Communion. By virtue of this office, the archbishop is also a Lord Spiritual, along with the other 25 Church of England bishops who sit in the House of Lords of the Parliament of the United Kingdom. Who is the 106th Archbishop of Canterbury, who succeeded the Right Honourable Archbishop Justin Welby?

History & Geography

01. Colombo is the largest city in Sri Lanka by population and the de facto commercial capital of the country. The Colombo metropolitan area is estimated to have a population of 5.6 million, with 752,993 people within the municipal limits. Colombo is divided into 15 numbered areas for postal purposes. Within these areas are suburbs with corresponding post offices. Which suburb is represented by Colombo 11?

02. Roads in Sri Lanka are classified hierarchically based on their function, traffic volume, and administrative authority. The system is primarily divided into national highways and provincial/local roads. A-Class roads, also known as trunk roads, are the principal roads linking provincial capitals and major cities, and are classified as AA, AB, or AC. There are 35 Class AA roads in Sri

Lanka. One of them is the A5 road, which starts from Peradeniya and passes through Badulla. What is the other end of the A5 road?

03. **[Audio]** This national anthem belongs to a Middle Eastern country. This country is considered the 5th largest in Asia and the 12th largest country in the world. It is governed as a unitary Islamic absolute monarchy, and its state emblem features a date palm tree with two crossed swords beneath it. What is the capital city of this country?

04. Charles de Batz de Castelmoré, also known as d'Artagnan and later Count d'Artagnan, was a French soldier who served Louis XIV as captain of the Musketeers of the Guard. He was killed during the Franco-Dutch War in 1673. His remains were long rumoured to have been buried in a Dutch church, but no evidence had been found until recently. According to recent discoveries, a group of archaeologists suggests that his remains may have been found beneath the floor of a Dutch church. During which siege was this famous musketeer killed in action?

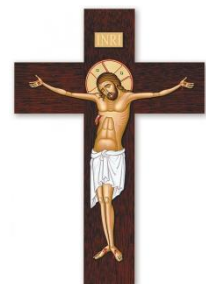

05. This was the Sultan of the Ottoman Empire from 1595 to 1603. He is known for ordering the execution of his 19 brothers in accordance with the Ottoman fratricide law. This practice was later abolished by his son and successor, Sultan Ahmed I, in the 1600s. Notably, this Sultan was the first in Ottoman history to father two future Sultans. He also maintained close diplomatic relations with Elizabeth I. Identify this Ottoman Sultan.

06. The Maratha Empire, also referred to as the Maratha Confederacy, was an early modern empire that dominated large parts of the Indian subcontinent from the late 17th to the early 19th century. In 1674, a Hindu nobleman carved out a kingdom from the Bijapur Sultanate and established the Maratha Empire. He became the Chhatrapati, meaning “king” in Sanskrit, in the same year and was crowned twice. Who was the first ruler of the Maratha Empire?

Art & Culture

01. I.N.R.I. is an initialism used in the Christian faith. These letters were placed on the cross by Pontius Pilate to indicate the charge against Jesus during his crucifixion, as recorded in the Gospels of the New Testament. The letters are commonly found at the top of crucifixes, representing the sign placed above Jesus's head. In the Roman Empire, it was customary to display the charges against a condemned person, often in a sarcastic manner. What does I.N.R.I. stand for? (providing the English meaning is acceptable)

02. Harry Potter is an upcoming fantasy television series developed for HBO, based on the series of eponymous fantasy books by J. K. Rowling. It is produced by HBO, Warner Bros. Television, Brontë Film & TV, and Heyday Films. The official teaser trailer for this TV series was recently released and recorded the most-watched trailer in HBO's history.

Following its release, some fans questioned the appearance of certain characters, which differed from the original books. This led to widespread discussion and criticism among die-hard Harry Potter fans on social media. One of the controversial characters is Professor Severus Snape, a teacher at Hogwarts School of Witchcraft and Wizardry. Who is set to portray Professor Severus Snape in the HBO Harry Potter TV series?

03. This painting was created by an Austrian-German painter, graphic artist, and book illustrator associated with the Impressionist and Art Nouveau styles. He spent significant time in Vienna, Munich, and Burghausen (Altötting), and was actively involved in the artistic communities of these cities. He was also an important member of the Vienna Secession, serving as its vice-president and exhibiting with the group many times. This artwork, titled *Pallas Athene* (1906), was painted by whom?

04. **[Audio]** This is a Sri Lankan patriotic song, sung by a Sri Lankan actress who has been active in cinema, theatre, as well as a songstress, politician, and media personality. The original lyricist of this song was Mr. Piyadasa Karandagolla, and the music was composed by Mr. M. G. Sugathadasa. Who is the Sri Lankan artist who sang this song?

05. Perry Mason is a fictional American criminal defense lawyer who is the main character in detective fiction written by an American author and lawyer. Perry Mason appears in 82 novels and four short stories, all involving a client charged with murder, usually centered on a preliminary hearing or jury trial. Mason typically establishes his client's innocence by identifying the real murderer. The character was inspired by Los Angeles criminal defense attorney Earl Rogers. Who is the original author of the Perry Mason series?

06. **[Audio]** This is the theme song of a Sinhala teledrama broadcast on Independent Television Network in the early 2000s. The theme was sung by the famous Sri Lankan pop boy band Centigradz. What is the name of this teledrama?

Science & Technology

01. In black hole physics, soft hair is a theorized method of information storage on the event horizon of a black hole and is considered a potential resolution to the black hole information paradox. Soft hair consists of zero-energy photons and/or gravitons on the event horizon generated by diffeomorphisms such as supertranslations and superrotations. This theory suggests that black holes may contain "soft hair," giving them more degrees of freedom than previously thought. These features exist at very low energy levels, which is why they were not accounted for in earlier calculations related to the no-hair theorem. This concept was discussed by a famous English theoretical astrophysicist, cosmologist, and author who served as Director of Research at the Centre for Theoretical Cosmology at the University of Cambridge. His final research paper on this topic was published after his death. Who is this scientist?

02. This is the only bone in the thigh—the region of the lower limb between the hip and the knee. The top of this bone fits into a socket in the pelvis called the hip joint, and the bottom connects to the shinbone (tibia) and kneecap (patella) to form the knee. It is considered the largest and thickest bone in the human body. Identify this bone.

03. The discovery of the double helix structure of the DNA molecule goes to James Watson, Francis Crick and Maurice Wilkins who eventually won the Nobel Prize in Physiology or Medicine in 1962. However this female English scientist whose X-ray diffraction studies on DNA that paved way to this discovery, was excluded as she had died in 1962. What is the name of this English scientist? (RQ 18)

04. What is the code of ethics that governs the use of human subjects in medical trials? This code was created following world war 2 in response to the unethical practices carried out by Nazi medical researchers and is named after the city in which they faced trial.

05. This French physicist is highly regarded for his contributions to Quantum theory, and his work on wave-particle duality. Who is this physicist who is best known for his 1924 PhD thesis where he calculated the wavelength of a photon and thus derived an equation to find the wavelength of any particle?

06. Foot-and-mouth disease (FMD), also known as hoof-and-mouth disease (HMD), is an infectious and sometimes fatal viral disease that primarily affects even-toed ungulates, including domestic and wild bovids. The virus causes a high fever lasting two to six days, followed by blisters inside the mouth and near the hooves that may rupture and cause lameness. Recently, FMD infections were reported in Hungary and Slovakia. Which country was the first to recognize FMD in 1870? (Quiz Buzz '25)

Sports & Games

01. This Russian player scored 5 goals in a world cup match against Cameroon in 1994 and still holds the record for the player with most no. of goals in a single world cup match. Notably, he shared the Golden Boot of 1994 FIFA World Cup with Bulgarian Hristo Stoichkov. Who is this player? (Quiz Buzz '25)

02. The Running of the Bulls is a famous animal sport event held annually in Spain. The most famous bull run takes place in Pamplona, Navarre, to honor a legendary holy man and martyr from Navarre. Who is this legendary character? (Quiz Buzz '25 - Preliminary rounds)

03. Kolkata Knight Riders became the champions at the end of 2024 IPL tournament. Which team became the first champions in 2008? (2024 Selection Test - MRCGKC)

04. James Anderson broke the record for most number of test wickets by a fast bowler by bowling out Mohammed Shami as his 564th test scalp surpassing the great Australian fast bowler Glenn McGrath. Glenn McGrath accumulated 563 test wickets in his test career spanning for 13 years. Who was the last batsman to be dismissed as McGrath's last test wicket? (RQ 18)

05. Dangal is a 2016 Hindi film starring Aamir Khan as a father who trains his daughters to excel in wrestling. His daughters won medals for wrestling in 2010 and 2014 Commonwealth Games and of them were qualified for the Olympics. What is the name of this former wrestler whose character is played by Aamir Khan in Dangal? (RQ 17)

06. The Men's Field Hockey World Cup, held in 2023, and witnessed Germany clinching their third title by defeating Belgium in a penalty shootout. However, which country holds the record for the greatest number of Men's Field Hockey World Cup titles with four titles in their bank?

General Knowledge Assessment 04

Time: 15 minutes
Level: Master/Pro

Name:

Membership code: MRC/GKC/...../.....

Class:

Marks:/100

Important:

- Answer all questions in a separate sheet of paper.
- Any kind of external support or using resources while answering is strictly prohibited.

Current Affairs

01. The United States Attorney General (AG) is the head of the United States Department of Justice (DOJ) and serves as the chief law enforcement officer of the federal government. The Attorney General acts as the principal legal advisor to the President of the United States on all legal matters. Recently, President Donald J. Trump removed the Attorney General from his second cabinet. Who is the 87th Attorney General of the United States who was fired by President Trump?

02. An indirect presidential election was held in Myanmar on 3 April 2026 following the country's general election. The newly elected president is an official of the military junta that seized power in Myanmar in 2021 through a military coup. He served as Prime Minister from 2021 to 2025 and as Acting President from 2025 to 2026. The new president-elect is expected to be sworn in this week. Who is this new president-elect of Myanmar?

03. This was an Australian television personality, psychologist, and relationship coach who was famous for appearing on the reality series Married at First Sight. She passed away in March 2026 after suffering from cancer for almost two years. She served as a dating expert on the show from 2016 until her death in 2026. Who is this person?

04. The Ministry of Buddha Sasana, Religious and Cultural Affairs is a cabinet ministry of the Government of Sri Lanka. It is responsible for maintaining the country's Buddhist heritage, assisting with other religious affairs, functions and festivals, supporting religious education, and preserving archaeological and religious sites. Who is the current Cabinet Minister of the Ministry of Buddha Sasana, Religious and Cultural Affairs in Sri Lanka, who was appointed by President Anura Kumara Dissanayake in his second cabinet?

05. **[Audio]** The audio clip you heard is the iconic opening chant of the famous Disney movie The Lion King. Recently, a video clip went viral claiming to show the actual translation of this chant, which was originally sung in the Zulu language. This translation was performed by a Zimbabwean stand-up comedian during a comedy show. As a result, the original composer of the song sued the comedian for \$27 million. Who is this Zimbabwean stand-up comedian?

History & Geography

01. The person in this picture was the last Tsar of Bulgaria, who came to power at around the age of six and was ultimately overthrown during the communist uprising in 1946. After years in exile, he returned to his country following the fall of communism in Bulgaria and later established his own political party. He then contested the 2001 Bulgarian general election and served as Prime Minister from 2001 to 2005. Identify this person who once reigned as the Tsar of Bulgaria and later became its Prime Minister.

02. Eelam War IV is the name given to the fourth and final phase of the armed conflict between the Sri Lankan military and the separatist Liberation Tigers of Tamil Eelam. It began when President Mahinda Rajapaksa ordered military action, citing the water cutoff carried out by the LTTE at the Mavil Aru anicut as the casus belli. What is the exact date on which Eelam War IV began?

03. To make criminals to confess, torturing them is a most common method which can be found in every corner in the world. In the Dynasty Korea (Joseon Era) this torture method was used on criminals to confess their crimes. In this method prisoner was tightly bound to a wooden chair and taking two thick pieces of wood and placing them between a prisoner's legs, which were then tightened to break the leg bones. After this punishment often these victims reported to face walking disabilities or permanent crippled. What is the Hangul name used to describe this torture method?

04. **[Audio]** This is the national anthem of an East Asian country. The country is considered the 11th most populous in the world. It is well known for its rapid advancements in technology, the automobile industry, and the animation field after World War II. Name the capital city and the largest city of this country.

05. This is the portrait of a British Prime Minister who served under King George III from 1770 to 1782. The portrait was painted by Sir Nathaniel Dance-Holland around 1773. The person in this picture was also the Earl of Guilford and served as a Member of Parliament representing a constituency in Oxfordshire, England. His son later became a Member of Parliament for the same constituency and also served as the first British Governor of Ceylon. Identify this person and name the constituency he represented in the House of Commons.

Art & Culture

01. This is an artwork by an English artist from the Victorian era. It is titled Katherine of Aragon and depicts Queen Catherine of Aragon playing cards with her lady-in-waiting, Anne Boleyn. Meanwhile, Henry VIII is shown approaching them. In the scene, Anne Boleyn is playing the Queen of Hearts, symbolizing the deeper story behind the image. Who was the original artist of this artwork?

02. **[Audio]** This is the news theme song of a popular Sri Lankan radio channel. The theme was used from the 1970s to the early 1990s. During that time, it was popularly used by the public to mock the political situation. Identify the radio channel that used this news theme song.

03. **[Audio]** This song was sung by a famous Swedish pop group that rose to global fame in the 1970s and 1980s. The group was formed in 1972 in Stockholm, Sweden, and its name was created using the first letters of the original members' names. The group consisted of two males and two females. Anni-Frid Lyngstad, Agnetha Fältskog, and Björn Ulvaeus are three of them. Who is the other male artist of this pop group, who is also a Swedish producer and composer?

04. **[Audio]** This song was popular among the younger Sri Lankan generation in the early 2000s. It was sung by a well-known juvenile artist of that time. As a child artist, he contributed to many fields, including cinema. The lyricist of this song was his father, who later became the Commander of the Sri Lankan Navy. Identify this beloved child artist.

05. This is a famous Sri Lankan author, especially popular among today's younger generation. In addition to his work as an author, he has also worked as a lawyer. His preferred genres are horror, mystery, and criminology. He is widely recognized for his exceptional translations, including the Perry Mason mysteries. He also writes his own detective stories, which are particularly popular among young Sri Lankans. Identify this young Sri Lankan author.

Science & Technology

01. **[Audio]** This is the call of a bird from the Gaviidae family. These birds are mostly found in waterways in Canada and the northern parts of the United States. Breeding adults have plumage that includes a broad black head and neck with a greenish, purplish, or bluish sheen,

blackish or blackish-grey upperparts, and pure white underparts, except for some black on the undertail coverts and vent. Identify this bird, which is known for its unique call.

02. An X-ray is a form of high-energy electromagnetic radiation with a wavelength shorter than that of ultraviolet rays and longer than that of gamma rays. These rays are widely used in the medical field to scan inside the human body, especially for examining human anatomy. X-rays were discovered in 1895 by a German physics professor during experiments with Crookes tubes. He was later awarded the first ever Nobel Prize in Physics in 1901 for this discovery. Identify this well-known physicist who discovered X-rays.

03. What is the unit of measurement for the amount of ozone in a vertical column of air above the earth? It's also used to measure other trace gases in the atmosphere. (QB 25 - Finals)

04. Spotify is an audio streaming and media service provider founded on 23 April 2006 by Daniel Ek and Martin Lorentzon. As of June 2024, it is one of the largest providers of music streaming services, with over 626 million monthly active users. What is the country of origin of Spotify? (Quaerentem 24)

05. The centre of Liver Diseases in Sri Lanka was inaugurated for liver transplant surgeries in March 2024 with a donation of 2.5 billion rupees from M.H. Omar Foundation. In which hospital was this special unit established? (G.C.E. A/L - Common General Test - 2024)

- (1) Colombo National Hospital
- (2) Colombo North Teaching Hospital, Ragama
- (3) Peradeniya Teaching Hospital
- (4) Anuradhapura Teaching Hospital
- (5) Colombo South Teaching Hospital, Kalubowila

Sports & Games

01. The 2026 President's Trophy Inter-Schools Knock-Out Rugby Tournament was held at Sugathadasa Stadium. This year's winning team emerged as champions after almost 15 years, defeating Royal College Colombo in the final. Which school emerged as the champions of the 2026 President's Trophy Inter-Schools Knock-Out Rugby Tournament, having last won in 2011?

02. Before becoming an actress, Deepika Padukone was a national-level badminton player, following in the footsteps of her father. Her father was one of the top singles badminton players during the 1970s and was ranked World No. 1 in 1980. He also co-founded the Olympic Gold Quest, an organization aimed at promoting Olympic sports in India. Who is this legendary badminton player? (The surname alone is not sufficient — the full name, including the first name, must be provided.) (Quaerentem 24)

03. Who is the only Formula 1 driver to win championships with four different constructors? He won championships with Alfa Romeo, Maserati, Ferrari, and Mercedes-Benz. (QB 25 - Finals)

04. Johnny Weissmuller was a successful actor known for playing Tarzan, but in the Olympics, he won 5 gold medals and 1 bronze medal in which sport? (QB 25 - 2nd Round)

- A. Swimming
- B. Shooting
- C. Rowing
- D. Fencing

05. In which category of sports did Lucion Pushparaj become the first ever Sri Lankan to win the world championship in December 2018? (G.C.E. A/L - Common General Test - 2025)

- (1) Bodybuilding
- (2) Weightlifting
- (3) Wrestling
- (4) Judo
- (5) Karate

Practical Workshop in Science - 2026

Pre-workshop Open-book Assignment

Time: 02 Hours

Name:

Membership code: MRC/GKC/...../.....

Class:

Marks:/400

Important:

- Answer all questions in separate sheets of paper.
 - Answer the questions as a group and submit the completed assignment individually.
 - You may use any reference materials to complete the assignment.
 - Mention at least four (04) references used to prepare your answers at the end of your answer script.
-

Question No. 01 [100 Marks]

A. **[40 Marks]** Answer the following questions using your knowledge of microscopes and microscopic observations.

(I) **[10 Marks]** There are mainly two types of microscopes: one uses a light beam to observe specimens, while the other uses an electron beam. Name these two types of microscopes and distinguish between them. Mention at least five facts for each.

(II) **[20 Marks]** List 10 parts of a typical light microscope and mention at least one function of each part.

(III) **[10 Marks]** Name the scientists responsible for the following discoveries and scientific achievements.

- (a) First scientist to introduce the term “cell”
- (b) First scientist to observe protozoa and bacteria
- (c) Scientists who proposed the double helix structure of DNA
- (d) Discovery of penicillin
- (e) Discovery of the rabies vaccine

B. **[50 Marks]** The following questions are based on your knowledge of the Animal Kingdom.

(I) **[20 Marks]** Define the following terms related to biological classification and give at least one example for each.

- (a) Domain
- (b) Kingdom
- (c) Phylum
- (d) Genus
- (e) Species

(II) **[10 Marks]** Distinguish between starfish and salmon fish. Mention at least five characteristic features of each and give examples.

(III) **[10 Marks]** State briefly what the following scientists discovered or contributed to biology. One sentence is sufficient.

- (a) Charles Darwin
- (b) Carl Linnaeus
- (c) Ernst Haeckel
- (d) Robert H. Whittaker
- (e) Carl Woese

(IV) **[10 Marks]** Describe the following terms.

- (a) Vertebrates
- (b) Invertebrates
- (c) Coelom
- (d) Dichotomous key
- (e) Reproduction

C. **[10 Marks]** Give qualitative tests used to identify the following biochemical compounds.

- (i) Reducing sugars
- (ii) Non-reducing sugars
- (iii) Polysaccharides (starch)
- (iv) Proteins
- (v) Lipids

Question No. 02 [100 Marks]

A. **[50 Marks]** Answer the following questions using your knowledge of General Chemistry.

(I) **[10 Marks]** Name 10 glassware items used in a chemistry laboratory.

(II) **[10 Marks]** Describe the following terms.

- (a) Acid
- (b) Base
- (c) Salt

- (d) Indicator
- (e) Catalyst

(III) **[10 Marks]** Name 5 acids, 5 bases, 5 salts, and 5 indicators commonly found in a chemistry laboratory.

(IV) **[10 Marks]** State 5 safety precautions that a chemistry student must be aware of while working in a chemistry laboratory.

(V) **[10 Marks]** Briefly explain the functions of the following laboratory equipment.

- (a) Glass rod
- (b) Tripod stand
- (c) Beaker
- (d) Boiling tube
- (e) Watch glass

B. **[50 Marks]** Answer the following questions using your knowledge of the periodic table and chemical elements.

(I) **[10 Marks]** Identify the element(s) most appropriate for the following descriptions.

- (a) Most electronegative element (electronegativity = 4.0)
- (b) Densest element
- (c) The only metal that exists in liquid state under standard conditions
- (d) Element with the highest first ionization energy
- (e) A radioactive element in Group 02

(II) **[20 Marks]** 4, 6, 11, 13, and 19 are the atomic numbers of certain elements in the periodic table. Identify them and give their mass number, number of electrons, number of neutrons, and valency. Present the information using a table.

(III) **[10 Marks]** Briefly describe the following terms with examples.

- (a) Metal
- (b) Metalloid
- (c) Non-metal
- (d) Noble gas
- (e) Halogen

(IV) **[05 Marks]** Name the scientists responsible for the following discoveries.

- (a) Periodic table
- (b) Billiard ball model of the atom
- (c) Planetary model of the atom
- (d) Plum pudding model of the atom
- (e) Discovery of hydrogen

(V) **[05 Marks]** Consider the following chemicals:

Na, H₂O₂, KMnO₄, CH₃COOH, I₂

Give the most appropriate answer for each description.

- (a) Can act as both an oxidizing and reducing agent in chemical reactions
- (b) Used as an indicator in titrations because of its dark purple colour and also used as a disinfectant in the medical field
- (c) Highly reactive with water and forms its hydroxide with explosive reactions
- (d) A weak acid commonly known as acetic acid, belonging to organic compounds
- (e) A halogen that changes directly from solid to gas by sublimation

Question No. 03 [100 Marks]

A. **[50 Marks]** Answer the following questions using your knowledge of chemical reactions and chemical bonding.

(I) **[10 Marks]** Define or describe the following terms.

- (a) Mole
- (b) Molar mass
- (c) Concentration
- (d) Isotope
- (e) Lewis structure

(II) **[10 Marks]** Draw the atomic structures of the following atoms according to the Bohr–Rutherford model (Planetary Model).

- (a) Cl
- (b) S
- (c) Al
- (d) N
- (e) Ne

(III) **[10 Marks]** Draw the most stable Lewis structures for the following compounds. Clearly indicate non-bonding electron pairs where necessary.

- (a) CO₂
- (b) Cl₂
- (c) NH₃
- (d) NO₃⁻
- (e) H₂O

(IV) **[20 Marks]** Write the products of the following chemical reactions and balance them accordingly. Mention the physical states correctly.

- (a) $\text{NaOH} + \text{HNO}_3$
- (b) $\text{CH}_4 + \text{O}_2$
- (c) CaCO_3 (heating)
- (d) $\text{Zn} + \text{CuSO}_4$
- (e) $\text{Na} + \text{H}_2\text{O}$

B. **[30 Marks]** A 0.4 g of NaOH pellets were taken from a container and added to a volumetric flask. It was dissolved in distilled water, and distilled water was added up to the mark to prepare 100 mL of NaOH solution.

(I) **[15 Marks]** Explain the terms in the equation:

$$n = m/M$$

Then calculate the number of moles of NaOH in the solution.

(Atomic masses: Na = 23, O = 16, H = 1)

(II) **[15 Marks]** Explain the terms in the equation:

$$C = n/V$$

Then calculate the concentration of the NaOH solution prepared above.

C. **[20 Marks]** Consider the reaction between NaOH and HCl.

(I) **[05 Marks]** Write the balanced chemical equation for the reaction. Mention the physical states of all compounds.

(II) **[10 Marks]** The reaction between NaOH and HCl is an acid–base neutralization reaction that produces a salt and water. 100 mL of NaOH solution with a concentration of 0.4 mol dm^{-3} was used. Calculate the number of moles of salt produced.

(III) **[05 Marks]** Calculate the number of molecules present in 80 g of NaOH. (Avogadro's constant = 6.022×10^{23})

Question No. 04 **[100 Marks]**

A. **[40 Marks]** Answer the following questions using your basic knowledge of Physics.

(I) **[10 Marks]** List and explain the basic SI units using a table.

(II) **[10 Marks]** Explain the following terms.

- (a) Units and dimensions
- (b) Force
- (c) Energy
- (d) Electromagnetic spectrum
- (e) Resonance

(III) **[10 Marks]** Carefully explain Newton's Laws of Motion. Use diagrams where necessary.

(IV) **[10 Marks]** Give the units of the following physical quantities. Express the units in terms of basic SI units and also mention the derived or special units where applicable.

- (a) Pressure
- (b) Density
- (c) Frequency
- (d) Kinetic energy
- (e) Work done

B. **[20 Marks]** Draw ray diagrams showing the correction of shortsightedness and farsightedness using appropriate lenses. Clearly indicate the rays, objects, lenses, and images.

C. **[40 Marks]** Solve the following problems according to the principles of Physics.

(I) **[10 Marks]** Carefully explain the terms in the equation:

$$S = ut$$

A car moves from point A to point B with a uniform velocity of 5 m s^{-1} for 10 s. Calculate the distance between point A and point B.

(II) **[10 Marks]** Carefully explain the terms in the equation:

$$F = ma$$

Suppose a shopping cart full of goods is stationary in an aisle of a supermarket. A shop assistant pulls it with a force of 30 N, causing it to accelerate at 2 m s^{-2} . Calculate the mass of the shopping cart and goods.

(III) **[20 Marks]** A brick of mass 1.5 kg is tied with a string to a horizontal bar on a roof.

(a) **[10 Marks]** Carefully explain the terms in the equation:

$$E = mgh$$

Calculate the gravitational potential energy of the brick if it is placed 10 m above floor level. (Acceleration due to gravity = 10 m s^{-2})

(b) **[10 Marks]** Carefully explain the terms in the equation:

$$E = \frac{1}{2}mv^2$$

Suppose the string is cut and the brick falls with a velocity of 10 m s^{-1} . Calculate the kinetic energy of the brick.

[No Answer Script]

Mahinda Rajapaksha College – Homagama
General Knowledge Club
Practical Workshop in Science - 2026
Final Assessment

Time: 02 Hours and 10 minutes

Name:

Membership code: MRC/GKC/...../.....

Class:

Marks:/400

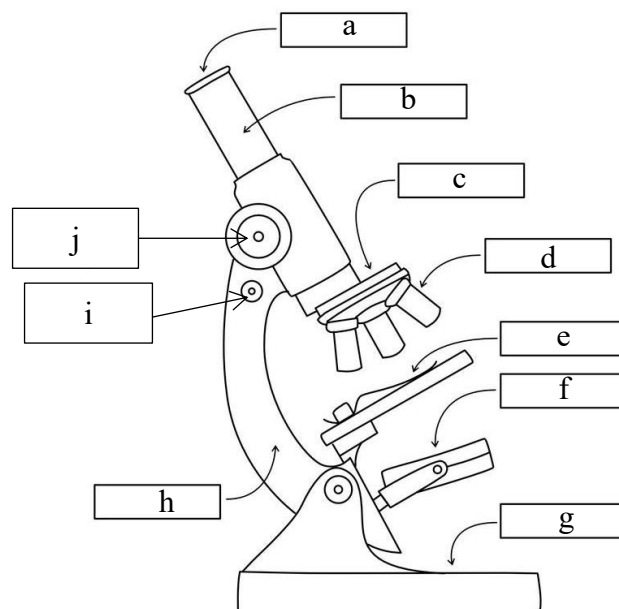

Important:

- Answer all the questions on separate sheets of paper.
- Group discussions are allowed among the respective group members.
- The use of external resources such as books, notes, or any digital media is strictly prohibited while answering the questions.
- You will have 2 hours to answer the questions and an additional 10 minutes to finalize your work. Within those 10 minutes, you must submit the completed assessment to the course coordinator as instructed.

Question No. 01 [100 Marks]

A. [40 Marks] A microscope is a scientific instrument used to observe organisms or cells that are not visible to the naked eye.

(I) [10 Marks] Name the parts of the microscope using the following diagram.

(II) **[10 Marks]** Briefly describe at least one function of each part you named in the above figure.

(III) **[10 Marks]** Assume that you are going to observe the cells of an onion tissue under a microscope. Write the step-by-step methodology for preparing a specimen and observing it under a compound light microscope.

(IV) **[10 Marks]** Distinguish between a light microscope and an electron microscope using at least five features for each.

B. **[40 Marks]** Kingdom Animalia is one of the four major kingdoms in the domain Eukarya.

(I) **[10 Marks]** Show the hierarchical classification of humans (*Homo sapiens*) from Domain to species. Consider only the taxa you have learned in the workshop. Use a flow chart.

(II) **[10 Marks]** Consider the figures of organisms belonging to Kingdom Animalia. Write the correct phylum of each animal species.

(a)

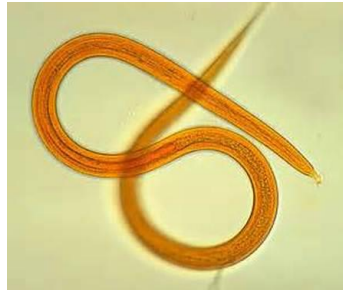

(b)

(c)

(d)

(e)

(f)

(g)

(h)

(i)

(j)

(III) **[10 Marks]** Consider the following figures of organisms belonging to Phylum Chordata. Write the correct class of each animal species.

(a)

(b)

(c)

(d)

(e)

(f)

(g)

(h)

(i)

(j)

(IV) **[10 Marks]** Distinguish between a cobra and an earthworm using at least five characteristic features of each animal.

C. **[20 Marks]** For further studies and research, it is essential to preserve dead animal specimens.

(I) **[10 Marks]** Suppose you found a freshly dead squirrel in your garden. Briefly describe how to preserve the specimen in a small jam bottle using isopropyl alcohol as the preserving medium.

(II) **[10 Marks]** Name at least five factors to consider when preparing and storing dead specimens for scientific studies.

Question No. 02 **[100 Marks]**

A. **[50 Marks]** Young scientist should have at least a general idea of what he/she should be aware of when working in a laboratory.

(I) **[10 Marks]** Name 10 laboratory ethics you should follow inside a chemistry laboratory.

(II) **[10 Marks]** Name the following glassware shown in the figures.

(a)

(b)

(c)

(d)

(e)

(f)

(g)

(h)

(i)

(j)

(III) **[10 Marks]** Name 5 acids and 5 bases commonly found in a chemistry laboratory.

(IV) **[10 Marks]** State the colour changes of the following indicators when they come into contact with the following solutions.

- (a) Phenolphthalein + NaOH
- (b) Phenolphthalein + HCl
- (c) Methyl Orange + HCl
- (d) Blue Litmus + HCl
- (e) Red Litmus + NaOH

(V) **[10 Marks]** Briefly explain the functions of the following laboratory equipment.

- (a) Pipette
- (b) Burette
- (c) Beaker
- (d) Boiling tube
- (e) Watch glass

B. **[50 Marks]** The Modern Periodic Table was introduced by Dimitri Mendeleev.

(I) **[10 Marks]** Identify the element(s) most appropriate for the following descriptions.

- (a) Most electronegative element (electronegativity = 4.0)
- (b) A non-metal element in Group 17 that has a red-brown colour
- (c) The only metal that exists in liquid state under standard conditions
- (d) Element with the highest second ionization energy
- (e) A radioactive element in Group 01

(II) **[20 Marks]** 4, 7, 12, 17, and 20 are the atomic numbers of certain elements in the periodic table. Identify them and state their most common mass number, number of electrons, number of neutrons, and valency. Present the information using a table.

(III) **[10 Marks]** Write five metals and five non-metals found in the periodic table.

(IV) **[05 Marks]** Name the scientists responsible for the following discoveries.

- (a) Naming of Oxygen
- (b) Billiard ball model of the atom
- (c) Quantum Wave model of the atom

- (d) Plum pudding model of the atom
- (e) Discovery of Hydrogen

(V) **[05 Marks]** Consider the following chemicals:

K, H₂O₂, KMnO₄, CH₃COOH, I₂

Give the most appropriate answer for each description.

- (a) Can act as both an oxidizing and reducing agent in chemical reactions
- (b) Used as an indicator in titrations because of its dark purple colour and also used as a disinfectant in the medical field
- (c) Highly reactive with water and forms its hydroxide with explosive reactions
- (d) A weak acid commonly known as acetic acid, belonging to organic compounds
- (e) A halogen that changes directly from solid to gas by sublimation

Question No. 03 **[100 Marks]**

A. **[50 Marks]** Chemical bonding refers to the lasting attraction between atoms, ions, or molecules that enables the formation of compounds.

(I) **[20 Marks]** Draw the atomic structures of the following atoms according to the Bohr–Rutherford model (Planetary Model). Clearly indicate the nucleus of each atom.

- (a) C
- (b) Si
- (c) Ar
- (d) Na
- (e) F

(II) **[10 Marks]** Draw the most stable Lewis structures for the following compounds. Clearly indicate non-bonding electron pairs where necessary.

- (a) CO₂
- (b) Br₂
- (c) HCl
- (d) NO₂
- (e) O₃

(III) **[20 Marks]** Write the products of the following chemical reactions and balance them accordingly. Mention the physical states correctly.

- (a) NaOH + H₂SO₄
- (b) CH₄ + O₂
- (c) CaCO₃ (heating)
- (d) Zn + CuSO₄
- (e) Mg + H₂O (Hot water)

B. **[35 Marks]** An amount of 0.8 g of NaOH was taken from a container and added to a volumetric flask. It was dissolved in distilled water, and distilled water was added up to the mark to prepare 100 mL of NaOH solution.

(I) **[15 Marks]** Explain the terms in the equation:

$$n = m/M$$

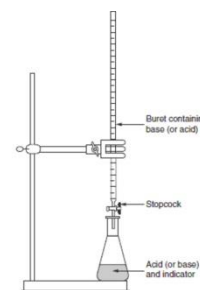

Then calculate the number of moles of NaOH in the solution.

(Atomic masses: Na = 23, O = 16, H = 1)

(II) **[15 Marks]** Explain the terms in the equation:

$$C = n/V$$

Then calculate the concentration of the NaOH solution prepared above.

(III) **[05 Marks]** Describe step-by-step how you measured the powdered NaOH using an electronic balance.

C. **[15 Marks]** The reaction between NaOH and HCl is an acid–base neutralization reaction that produces a salt and water.

(I) **[10 Marks]** A 100 mL NaOH solution with a concentration of 0.2 mol dm^{-3} was used. Calculate the number of moles of salt produced.

(II) **[05 Marks]** Calculate the number of molecules present in 20 g of NaOH. (Avogadro's constant = 6.022×10^{23})

Question No. 04 **[100 Marks]**

A. **[40 Marks]** Units and dimensions are the foundational language of physics. A dimension describes the physical nature of a quantity, while a unit is the specific standardized magnitude assigned to that dimension.

(I) **[20 Marks]** List and explain the seven basic SI units using a table.

(II) **[10 Marks]** Carefully explain Newton's Laws of Motion. Use diagrams where necessary.

(III) **[10 Marks]** Give the units of the following physical quantities. Express the units in terms of basic SI units and also mention the derived or special units where applicable.

- (a) Pressure
- (b) Power
- (c) Frequency
- (d) Kinetic energy
- (e) Force

B. **[20 Marks]** A Wave is a disturbance that transfers energy through a medium or vacuum without causing a permanent displacement of the particles of the medium.

(I) **[10 Marks]** Identify the following types of mechanical waves created using a slinky. Name them correctly and state at least two characteristic features of each.

(a)

(b)

(II) **[10 Marks]** Identify the following apparatus shown in the figures that can be found in a physics laboratory.

[Sonometer / Tuning Fork / Travelling Microscope / U-tube Manometer / Telescope]

(a)

(b)

(c)

(d)

(e)

C. **[40 Marks]** Solve the following problems according to the principles of Physics.

(I) **[10 Marks]** Carefully explain the terms in the equation:

$$S = ut$$

A car moves from point A to point B with a uniform velocity of 15 m s^{-1} for 10 s. Calculate the distance between point A and point B.

(II) **[10 Marks]** Carefully explain the terms in the equation:

$$F = ma$$

Suppose a shopping cart full of goods is stationary in a supermarket aisle. A woman pulls it with a force of 20 N, causing it to accelerate at 2 m s^{-2} . Calculate the mass of the shopping cart and goods.

(III) **[20 Marks]** A metal block of mass 2 kg is tied with a string to a horizontal bar on a roof.

(a) **[10 Marks]** Carefully explain the terms in the equation:

$$E = mgh$$

Calculate the gravitational potential energy of the block if it is placed 20 m above floor level.

(Acceleration due to gravity = 10 m s^{-2})

(b) **[10 Marks]** Carefully explain the terms in the equation:

$$E = \frac{1}{2}mv^2$$

Suppose the string is cut and the block falls with a velocity of 20 m s^{-1} . Calculate the kinetic energy of the metal block.

- Answer all questions in a separate sheet of paper.
- Any kind of external support or using resources while answering is strictly prohibited.

Current Affairs

01. Ceylon Biscuits Limited (CBL), commonly known by its flagship brand Munchee, is one of Sri Lanka's pioneering food manufacturing companies. It traces its origins to a small bakery established in Dehiwala in 1939 by Mr. Simon Arthur Wickramasinghe. Following his death in 1961, his sons took over the business and expanded its operations. Earlier this month, one of his sons, who later served as Chairman of the CBL Group, passed away. Name the late Chairman of the CBL Group who led the company until his death in 2026.

02. Sathara Publishers is one of Sri Lanka's leading educational publishers, offering a wide range of preschool to Advanced Level (A/L) textbooks, workbooks, and monthly magazines. The company specializes in educational materials based on the Sri Lankan curriculum in both Sinhala and English mediums. In May 2026, the founder of Sathara Publications passed away at the age of 82. Name this well-known Sri Lankan educationist who also served as an officer of the Sri Lanka Educational Administrative Service.

03. The 52nd G7 Summit was held in Évian-les-Bains, France, from 15 to 17 June 2026. As the holder of the rotating presidency, France focused the summit agenda on restoring global economic stability, addressing geopolitical crises, and regulating emerging technologies. To promote global cooperation, France invited five outreach partner countries: two from Asia, two from Africa, and one from South America. Egypt was one of the African countries invited. Name the other African country that was invited to the 2026 G7 Summit.

04. **[Audio]** This is the opening theme of the famous television series The Adventures of Merlin. It is a British fantasy-adventure drama series, loosely based on the Arthurian legends and the relationship between Merlin and King Arthur. The series was originally broadcast from 2008 to 2012. Recently, the actor who portrayed King Uther Pendragon, the father of King Arthur, passed away. Name this legendary actor who starred as Uther Pendragon.

05. The State Vesak Festival 2026 was celebrated in Sri Lanka under the theme "Abhiththaretha Kalyane" ("Hasten Towards the Good"). Vesak Week was declared from 27 May to 2 June 2026 and featured island-wide religious, cultural, and community programmes. In 2026, where did the main inaugural ceremony of the State Vesak Festival take place with the participation of His Excellency the President of the Democratic Socialist Republic of Sri Lanka?

06. The Commission to Investigate Allegations of Bribery or Corruption (CIABOC) is Sri Lanka's apex independent anti-corruption body. It is legally empowered to investigate and prosecute allegations of bribery, corruption, and illicit enrichment involving public servants and state officials. Recent investigations and arrests carried out by the Commission have drawn significant public attention to its leadership. Who is the current Director General of CIABOC, a former High Court Judge who assumed office on 10 January 2025?

History & Geography

01. Public bus routes in Sri Lanka are broadly categorized into intercity (inter-provincial) routes connecting major districts and local routes operating within urban centres such as Colombo. Sri Lankan bus route numbers range from 1 to 999. Route No. 999 is one of the highest-numbered public bus routes in the country. If one terminal of this route is Mirigama, name its other terminal.

02. A royal cremation ground is a site where monarchs and members of a royal dynasty are cremated according to specific religious and state rituals. During the Kandyan era, the royal cremation and burial grounds were located within a renowned Buddhist temple in the Kandy District. However, many of the royal tombs were destroyed during the construction of the Matale railway line. Identify the Buddhist temple where this royal cremation ground, commonly known as the "Adahana Maluwa", is located.

03. This person was known for her decisive action against child marriage and her advocacy for education for both girls and boys in Malawi. She was a Malawian paramount chief and activist who was primarily active in the Dedza District of central Malawi. Under her leadership, more than 3,500 child marriages were annulled. Identify this remarkable female leader, known as "The Terminator," who passed away in August 2025.

04. In 1990, the son of a Japanese immigrant became the 54th President of a Latin American country. His election was remarkable because he became one of the most prominent heads of state of Japanese descent outside Japan, despite Japan itself not having a presidential system of government. He was Alberto Fujimori Inomoto. Name the country of which he became the 54th President.

05. The Inter University Students' Federation (IUSF), commonly known as the IUSF or "Anthare", is one of the largest student organizations in Sri Lanka. Established in 1978, it represents the collective voice of student unions from major state universities across the country. The IUSF functions as an umbrella organization for various student unions and is well known for its activism on issues relating to free education, student welfare, and broader national concerns. In which state university is the headquarters of the IUSF located?

06. Who is considered the first female principal in Sri Lanka? She was the highly respected founder and first principal of Kegalu Balika Vidyalaya, originally known as Kegalu Buddhist English Ladies' College, in the Kegalle District. She was later honoured with the title "Sri Lanka Sikhamani".

Arts & Culture

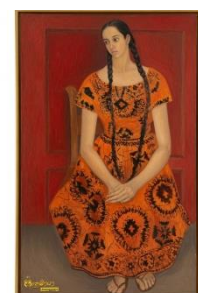

01. This artwork, titled Highgrove House – A View from the Wildflower Meadow, depicts Highgrove House, the country residence of the British Royal Family. The watercolour was painted by a prominent British public figure born into the Royal Family in 1948. Identify the original artist of this artwork.

02. [Audio] The evolution of public address systems within Sri Lanka Railways mirrors the network's transition from a colonial-era freight railway to a modern mass-transit service. The shift from live announcers to automated digital announcements transformed the way millions of commuters receive travel information each day. To address communication challenges, Sri Lanka Railways introduced an automated digital announcement system. A well-known female broadcaster and media personality was selected to record the core Sinhala voice database for these announcements. As heard in the audio clip, identify this media personality.

03. This is a prominent 1950 oil-on-canvas painting created by the celebrated Sri Lankan artist Ivan Peries. The subject of the painting was a young Sri Lankan woman who later became a veteran actress, and the artwork bears her name as its title. The painting is now part of the permanent collection of the Petit Palais in Paris, France, having been

acquired following the European exhibitions of the '43 Group during the 1950s. Identify this veteran Sri Lankan actress who was the subject of the painting.

04. **[Audio]** This is the famous English song Wannabe, performed by a renowned English pop girl group. Formed in 1994, the group has sold more than 100 million records worldwide, making it the best-selling girl group of all time. With its iconic "Girl Power" slogan, the group redefined the concept of a girl band by appealing to a young female fan base. Name this famous girl group.

05. **[Audio]** This song was performed by a Latvian-born Russian-Ukrainian singer who achieved global viral fame for his unique head voice and eccentric musical style. Best known for his extraordinary multi-octave vocal range, he blends operatic pop, techno, dance, and folk music into highly distinctive performances. Name this artist.

06. **[Video/Audio]** This song was adapted from Vikurthi (Distortion), a famous Sri Lankan satirical stage play written and directed by the late Somalatha Subasinghe. The play is a sharp critique of the Sri Lankan education system and societal pressures. It highlights the struggles of young people caught in a tug-of-war between their own talents and aspirations and the often unrealistic expectations of their parents. The play is also a prescribed text in the G.C.E. Ordinary Level (O/L) Drama and Theatre syllabus. In which year was this drama first staged?

Science & Technology

01. The periodic table organizes all 118 known chemical elements according to their atomic numbers, electron configurations, and recurring chemical properties. A chemical element is a pure substance consisting entirely of atoms with the same number of protons. One element is named after the Greek god of the Sun because it was first identified in the Sun's spectrum during a solar eclipse. Identify this element, which is also the second-lightest and one of the least reactive noble gases.

02. **[Audio]** The conversation you have just heard took place between an Indian school student and a renowned Indian scientist. This individual is widely regarded as one of India's greatest aerospace engineers and later served as a statesman. Identify this person, who is famously known as the "Missile Man of India".

03. A phobia is an uncontrollable, irrational, and persistent fear of a specific object, situation, or activity. Unlike ordinary fears, a phobia triggers anxiety that is greatly disproportionate to the actual danger involved, often causing individuals to avoid the trigger entirely or experience panic attacks. What is dendrophobia?

04. SWOT satellite launched by NASA in partnership with few other government agencies has the objective to carry out first global survey of the Earth's surface water, how terrestrial surface water bodies change over time. What does mission SWOT stand for (Copy – quiz)?

05. Carl Linnaeus is known as the father of taxonomy, and he is known for developing the current system for scientific names of species such as Homo Sapiens or Tyrannosaurus Rex. Can you name Linnaeus' groundbreaking 1735 book that introduced the binomial nomenclature system to the world (Copy – quiz).

06. Athabasca oil sands are buried deposit of one of the world's largest reserves of oil. It contains Bitumen also called asphalt mixed with grains of sand and other minerals in a deposit that covers a land area more than that of England in comparison. To which country does this area belong (Copy – quiz)?

Sports & Games

01. Which tennis player holds the record for the most men's singles titles in the Open Era, a remarkable achievement that has solidified their place as one of the greatest players in the history of the sport? With a career spanning several decades, this player has dominated the tennis world, setting numerous records and earning a legacy of success. What is the name of this tennis legend who holds this prestigious record (Copy – quiz)?

02. Morocco National Football Team became the first African nation to qualify for the semi-finals of a FIFA World Cup after they beat Portugal by 1-0 in the quarterfinals ending Cristiano Ronaldo's dream run in the 2022 edition. What is the nickname of the Morocco National Football Team (Copy – quiz)?

03. The Denver Nuggets clinched their inaugural NBA championship by defeating the Miami Heat in the finals. Who was the first center since Shaquille O'Neal of the Los Angeles Lakers in 2002 to win the Most Valuable Player of the NBA Finals award, named after the late Bill Russell (Copy – quiz)?

04. What is the national sport of Bangladesh, a traditional and popular game that involves two teams and requires both strategy and physical endurance, with a deep cultural significance in the country (Copy – quiz)?

05. What is the name of the traditional Central Asian sport where riders, mounted on horseback, attempt to capture and carry a goat carcass, often engaging in intense competition and showcasing their horsemanship skills? This unique and historic sport is a key part of the cultural heritage of the region. What is the name of this ancient and thrilling sport (Copy – quiz)?

06. In May 2024, Pep Guardiola's Manchester City achieved a historic feat by becoming the second English team to secure the treble in the same season, winning the Champions League by defeating Inter Milan, three-time winners of the tournament. Which English team accomplished this same feat for the first time in the 1998/99 season (Copy – quiz)?

Current Affairs

01. The G7 (Group of Seven) is an informal grouping of seven advanced democracies: the United States, Canada, France, Germany, Italy, Japan, and the United Kingdom, with the European Union also participating in its meetings. In which country was the 2026 G7 Summit held?

02. Recently, the Prime Minister of the United Kingdom announced his intention to resign amid political disputes within his own party. Name the current Prime Minister of the United Kingdom who has announced his resignation.

03. **[Audio]** The song you've heard, "Ude Hawa Dakinawa," is a popular song sung by a famous Sri Lankan singer who passed away recently. Name this artist.

04. The captain of the England cricket team has decided to retire from international cricket. He made this dramatic announcement midway through England's third Test against New Zealand at Trent Bridge. Name this legendary cricketer.

05. Dengue is a mosquito-borne viral infection transmitted primarily by a mosquito. These days, a clear increase in cases can be seen in Sri Lanka. Name the mosquito genus commonly associated with this disease.

History & Geography

01. **[Audio]** The anthem you've heard is the university anthem of the University of Peradeniya. It was originally established in 1942 as the University of Ceylon and was later given the name University of Peradeniya. From which year has this prestigious Sri Lankan state university been known as the University of Peradeniya?
02. **[Audio]** This is the national anthem of a country in northwestern Europe, off the coast of the continental mainland. Identify this country and name its capital city.
03. **[Audio]** The song you've heard is known as "Hail to the Chief", the personal anthem used by the President of the United States. This song was published in 1812 and was later adopted as the presidential anthem. It is widely used in presidential inauguration ceremonies to introduce the outgoing and incoming Presidents. Which President of the United States (POTUS) used this song at his inauguration for the first time?
04. **[Audio]** The audio clip you've heard contains a speech delivered by a prominent political figure in Sri Lanka. He served as the President of Sri Lanka and made a significant turning point in the country's economy. Identify this person.
05. Who was the last Emperor of the Russian Empire, overthrown and ultimately executed along with his family after the Russian Revolution?

Arts & Culture

01. In English, there are some Latin phrases still used to describe certain situations and nouns. "Alma Mater" is one of them and is commonly associated with a person's educational institution. What is the actual meaning of the phrase "Alma Mater"?
02. **[Audio]** The music piece you've heard was associated with the royal court during the Kandyan era. These types of songs were used to praise the king during that time and were sung by the royal poets known as the Kavikara Maduwa. Identify this performing art.
03. **[Audio]** The song "Do-Re-Mi" ("Doe, a Deer") is a popular song from the famous 1965 musical. Name the movie from which this song was adapted.
04. **[Audio]** The song you've heard, "Sonne", is a German song performed by a German heavy metal band. Identify this band.
05. **[Audio]** This song, "Sagare Wage Syllabus", was adapted from a famous Sri Lankan movie. The movie is based on the life journey of A/L students who struggle with the ups and downs of life while striving to achieve academic success. Name this movie.

Science & Technology

01. What is the term used to identify a doctor who specializes in the treatment of childhood illnesses, simply a doctor of children?
02. A phobia is an intense, irrational, and persistent fear of a specific object, situation, or activity. What is the scientific term used to describe the "fear of fears"?
03. The International System of Units (SI) defines seven fundamental base units of measurement. What is the SI unit used to symbolize amount of substance?
04. Who is the famous Serbian-American engineer known for his contributions to the design of the modern alternating current (AC) electricity supply system?
05. What chemical substance is commercially referred to as caustic soda?

Sports & Games

01. Which Formula 1 driver won 7 world championships and shares the record with Michael Schumacher, and drives for Mercedes as of 2024?
02. In cricket, what is the term for when a bowler takes 3 wickets with 3 balls in a row?
03. Which country won the Rugby World Cup in 2023, beating New Zealand in the final in France?
04. In the Olympics, which sport uses an "épée", "foil", and "sabre" as its three weapons?
05. Which video game, released in 2017, is a battle royale where 100 players drop onto an island and the last one standing wins?
